The *Journal of the American Society for Information Science and Technology* (Print ISSN: 1532-2882; Online ISSN: 1532-2890 at Wiley InterScience, www.interscience.wiley.com) is the official journal of the American Society for Information Science and Technology, **1320 Fenwick Lane, Suite 510, Silver Spring, MD 20910; Tel: (301) 495-0900, asis@asis.org**. It is published monthly, except twice in January and February for the Society by Wiley Subscription Services, Inc., a Wiley Company. The positions expressed by the contributors do not necessarily reflect the position or the official policy of the Society.

Copyright © 2007 by Wiley Periodicals, Inc., a Wiley Company. All rights reserved. No part of this publication may be reproduced in any form or by any means, except as permitted under section 107 or 108 of the 1976 United States Copyright Act, without either the prior written permission of the publisher, or authorization through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923; Tel: (978) 750-8400, Fax: (978) 646-8600. Periodicals Postage Paid at Hoboken, NJ, and at additional mailing offices.

The code and the copyright notice appearing at the bottom of the first page of an article in this journal indicate the copyright holder's consent that copies may be made for personal or internal use, or for the personal or internal use of specific clients, on the condition that the copier pay for copying beyond that permitted by Sections 107 or 108 of the United States Copyright Law. The per-copy fee is to be paid through the Copyright Clearance Center, Inc. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Such permission requests and other permission inquiries should be addressed to the Permissions Dept., c/o John Wiley & Sons, Inc. 111 River Street, Hoboken, NJ 07030-5774; Tel: (201) 748-6011, http://www.wiley.com/go/permissions.

Subscription Price (Volume 58, 2007): Print only: $1,960.00 in US, $2,100.00 in Canada and Mexico, $2,219.00 outside North America. Electronic only (includes online ASIST Digital Library): $2,155.00 worldwide. A combination price of $2,351.00 in US, $2,491.00 in Canada and Mexico, $2,610.00 outside North America, includes the subscription in both electronic (with online ASIST Digital Library) and print formats. All subscriptions outside US will be sent by air. Payment must be made in US dollars drawn on a US bank. Claims for undelivered copies will be accepted only after the following issue has been received. Please enclose a copy of the mailing label. Missing copies will be supplied when losses have been sustained in transit and where reserve stock permits. Please allow four weeks for processing a change of address. Subscription inquiries should be addressed to John Wiley & Sons, Inc., Attn: Journals Admin. Dept. UK, 111 River Street, Hoboken, NJ 07030-5774; Tel: (201) 748-6645, E-mail: subinfo@wiley.com.

Postmaster: Send address changes to the *Journal of the American Society for Information Science and Technology*, Subscription Distribution US, c/o John Wiley & Sons, Inc., 111 River Street, Hoboken, NJ 07030-5774.

Advertising Sales: Inquiries concerning advertising should be addressed to: Advertising Sales Manager, c/o John Wiley & Sons, Inc., 111 River Street, Hoboken, NJ 07030-5774; Tel: (201) 748-8832. Advertising Sales, European Contact: Jackie Sibley, John Wiley & Sons, Ltd., The Atrium, Southern Gate, Chichester, West Sussex, PO19 8SQ, England; Tel: 44 1243 770 351, Fax: 44 1243 770 432, E-mail: adsales@wiley.co.uk.

Reprints: Reprint sales and inquiries should be directed to the Customer Service Dept., Gale Krouser, c/o John Wiley & Sons, Inc., 111 River Street, Hoboken, NJ 07030-5774; Tel: (201) 748-8789, Fax: (201) 748-6326, E-mail: gkrouser@wiley.com.

JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Author Index to Volume 58

Abbas, June
the impact of youth's use of the Internet on their use of the public library, 2180–2197
Acedo, Erika
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743
Adams, Stephanie J.
information seeking behavior of academic scientists, 2206–2226
Adiego, Joaquín
Lempel-Ziv compression of highly structured documents, 461–478
Agnew, Grace
integrating MPEG-7 into the Moving Image Collections Portal, 1357–1363
Agosto, Denise E.
[book review], 303, 1704
Ahmad, Ashraf M. A.
[book review], 457–458
Allen, Melissa
determining factors of academic library Web site usage, 2325–2334
Alonso-Arroyo, Adolfo
keywords given by authors of scientific articles in database descriptors, 1175–1187
An, Aijun
personalized recommendation with adaptive mixture of Markov models, 1851–1870
Argamon, Shlomo
stylistic text classification using functional lexical features, 802–822
Arh, Tanja
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
Asonuma, Akihiro
reflections on the age distribution of Japanese scientists, 762 (erratum)
Åström, Fredrik
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957
Baeza-Yates, Ricardo
improving search engines by query clustering, 1793–1804
Bai, Bing
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
Bar-Ilan, Judit
children as architects of Web directories: an exploratory study, 895–907
user rankings of search engine results, 1254–1266
Barjak, Franz
which factors explain the Web impact of scientists' personal homepages?, 200–211
Barry, Carol L.
in this issue, 1–2, 155–156, 307–308, 459–460, 611–612, 763–765, 913–914, 1069–1070, 1225–1226, 1389–1391, 1557–1558, 1707–1708, 1911–1914, 2163–2166
Baruchson-Arbib, Shifra
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
Bederson, Benjamin B.
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
Beheshti, Jamshid
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
Beitzel, Steven M.
exploiting parallelism to support scalable hierarchical clustering, 1207–1221
temporal analysis of a very large topically categorized Web query log, 166–178
Belous, Yifat
children as architects of Web directories: an exploratory study, 895–907
Benitez, Ana B.
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
structure description tools, 1329–1337
Benjamin, Robert I.
understanding information related fields: a conceptual framework, 1934–1947
Bensman, Stephen J.
the impact factor, total citations, and better citation mouse traps: a commentary, 1904–1908
Bernbaum, Diana J.
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Betts, Lucy
effects of spacing and titles on judgments of the effectiveness of structured abstracts, 2335–2340
Bhandar, Mamata
towards understanding the roles of social capital in knowledge integration: a case study of collaborative information systems project, 263–274
Birmingham, William P.
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
Birnholtz, Jeremy P.
when do researchers collaborate? toward a model of collaboration propensity, 2227–2240
Bishop, Kay
the impact of youth's use of the Internet on their use of the public library, 2180–2197
Blakely, Chris
defining a session on Web search engines, 862–871
Blandford, Ann
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
Blažič, Borka Jerman
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
Bolstad, Judy P.
[book review], 152–153
Bonnici, Laurie J.
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577
Borlund, Pia
matrix comparison, part 1: motivation and important issues for measuring the resemblance between proximity measures or ordination results, 1586–1595
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609
Bornmann, Lutz
multiple publication on a single research study: does it pay? the influence of number of research articles on total citation counts in biomedicine, 1100–1107
what do we know about the *h* index?, 1381–1385
Bronstein, Jenny
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
Brown, Cecelia
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
Buchanan, George
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
Buchanan, Tom
development of measures of online privacy concern and protection for use on the Internet, 157–165
Budd, John M.
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
Burmester, Kristen
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Burnett, Kathleen
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577
Burrell, Quentin L.
Egghe's construction of Lorenz curves resolved, 2157–2159

Buschman, John
democratic theory in library information science: toward an emendation, 1483–1496
Câmara, Gilberto
information policies and open source software in developing countries, 121–132
Campanario, Juan Miguel
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743
structure of the impact factor of journals included in the *Social Sciences Citation Index*: citations from documents labeled "editorial material," 252–262
Cathey, Rebecca J.
exploiting parallelism to support scalable hierarchical clustering, 1207–1221
Cen, Rongwei
data cleansing for Web information retrieval using query independent features, 1884–1898
Chan, Ivy
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365
Chang, Shih-Fu
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
Chase, Paul
stylistic text classification using functional lexical features, 802–822
Chau, Michael
automated criminal link analysis based on domain knowledge, 842–855
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054
Chen, Hsin-Hsi
mining opinions from the Web: beyond relevance retrieval, 1838–1850
Chen, Hsinchun
automated criminal link analysis based on domain knowledge, 842–855
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365
Chen, Sherry Y.
automatic cognitive style identification of digital library users for personalization, 237–251
Chen, Zhaohui
understanding user acceptance of multimedia messaging services: an empirical study, 2066–2077
Chen, Zhixiang
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)
Cheung, Christy
understanding user acceptance of multimedia messaging services: an empirical study, 2066–2077
Chiang, I-Ping
characterizing Web users' online information behavior, 1988–1997
Chien, Lee-Feng
Web-based text classification in the absence of manually labeled training documents, 88–96
Chinchilla-Rodríguez, Zaida
visualizing the marrow of science, 2167–2179
Chowdhury, Abdur
temporal analysis of a very large topically categorized Web query log, 166–178
Chua, Alton Y. K.
an analysis of the delayed response to Hurricane Katrina through the lens of knowledge management, 391–403
a tale of two hurricanes: comparing Katrina and Rita through a knowledge management perspective, 1518–1528
Chung, Jin Soo
high school students' information seeking and use for class projects, 1503–1517
Cole, Charles
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
Coleman, Anita
assessing the value of a journal beyond the impact factor, 1148–1161
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296
Cook, Darrell
[book review], 456–457
Corera-Álvarez, Elena
visualizing the marrow of science, 2167–2179
Cronin, Blaise
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
Cui, Hong
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Daniel, Hans-Dieter
multiple publication on a single research study: does it pay? the influence of number of research articles on total citation counts in biomedicine, 1100–1107
what do we know about the *h* index?, 1381–1385
Dannenberg, Roger B.
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
Day, Ronald E.
Kling and the "critical": social informatics and critical informatics, 575–582
D'Elia, George
the impact of youth's use of the Internet on their use of the public library, 2180–2197
Denn, Sheila O.
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Desouza, Kevin C.
[book review], 608–609
Dickinson, Harley D.
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
Dinçer, Bekir Taner
statistical principal components analysis for retrieval experiments, 560–574
Ding, Chen
user modeling for personalized Web search with self-organizing map, 494–507
Dominich, Sándor
a measure theoretic approach to information retrieval, 1108–1122
Druin, Allison
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
Eaglestone, Barry
data mining of search engine logs, 2382–2400
Edwards, Phillip M.
[book review], 2160–2161
Egghe, Leo
[book review], 756–758
dynamic *h*-index: the Hirsch index in function of time, 452–454
TOP-curves, 777–785
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709
Elsweiler, David
towards memory supporting personal information management tools, 924–946
Ennis, Lisa A.
[book review], 302, 1386
Erdelez, Sanda
the search experience variable in information behavior research, 1529–1546
Evain, Jean-Pierre
TV-Anytime Phase 1 and MPEG-7, 1367–1373
Fang, Xiao
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054
Fang, Y. C.
citation data analysis on hydrogeology, 518–525
Fang, Yong
reflections on the age distribution of Japanese scientists, 762 (erratum)
Fatemi, Nastaran
MPEG-7 in practice: analysis of a television news retrieval application, 1364–1366
Flammia, Madelyn
language as power on the Internet, 1899–1903
Fonseca, Frederico
the double role of ontologies in information science research, 786–793
information policies and open source software in developing countries, 121–132
Foo, Schubert S. B.
an analysis of the delayed response to Hurricane Katrina through the lens of knowledge management, 391–403
Ford, Nigel
data mining of search engine logs, 2382–2400
Frías-Martínez, Enrique
automatic cognitive style identification of digital library users for personalization, 237–251
Frieder, Ophir
exploiting parallelism to support scalable hierarchical clustering, 1207–1221
temporal analysis of a very large topically categorized Web query log, 166–178

DOI: 10.1002/asi

Fry, Jenny
impact of research cultures on the use of digital libraries, 1674–1685
Fu, Bin
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)
Fuente, Pablo de la
Lempel-Ziv compression of highly structured documents, 461–478
Gaffney, Sean
[book review], 2405–2407
Galliers, Robert D.
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
Galvez, Carmen
approximate personal name-matching through finite-state graphs, 1960–1976
Garg, Navendu
stylistic text classification using functional lexical features, 802–822
Gasser, Les
a framework for information quality assessment, 1720–1733
Gathegi, John
punishment and ethics deterrents: a study of insider security contravention, 212–222
Gazan, Rich
[book review], 151–152
Gil-Garcia, J. Ramon
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
Gil-Leiva, Isidoro
keywords given by authors of scientific articles in database descriptors, 1175–1187
Gillet, Valerie J.
data mining of search engine logs, 2382–2400
Gillman, Daniel W.
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Given, Lisa M.
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617
Godejord, Per Arne
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451
Goh, Dion Hoe-Lian
automatic multidocument summarization of research abstracts: design and user evaluation, 1419–1435
link decay in leading information science journals, 15–24
Goldstein, Michel L.
manifestation of research teams in journal literature: a growth model of papers, authors, collaboration, coauthorship, weak ties, and Lotka's law, 1764–1782
Gómez, Jaime
[book review], 910–911, 2401–2402
González, Lidia
structure of the impact factor of journals included in the *Social Sciences Citation Index:* citations from documents labeled "editorial material," 252–262
Gow, Jeremy
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
Graham, Paul J.
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
Grossman, David
exploiting parallelism to support scalable hierarchical clustering, 1207–1221
temporal analysis of a very large topically categorized Web query log, 166–178
Gruzd, Anatoliy
[book review], 758–760
Hamilton, Elizabeth C.
the impact of survey data: measuring success, 190–199
Hara, Noriko
information technology support for communities of practice: how public defenders learn about winning and losing in court, 76–87
knowledge sharing in online environments: a qualitative case study, 2310–2324
Harrell, S. Veeragoudar
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Harris, Lydia Eato
[book review], 606–607
Harrison, Teresa M.
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
Hartel, Jenna
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
Hartley, James
effects of spacing and titles on judgments of the effectiveness of structured abstracts, 2335–2340
Hastall, Matthias R.
news cues: information scent and cognitive heuristics, 366–378
Hawking, David
does topic metadata help with Web search?, 613–628
Hayden, Lance
[book review], 303–305
He, Wu
the search experience variable in information behavior research, 1529–1546
Heidorn, P. Bryan
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Heinrichs, John H.
determining factors of academic library Web site usage, 2325–2334
Hemminger, Bradley M.
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352
information seeking behavior of academic scientists, 2206–2226
Hemphill, Libby
[book review], 2404–2405
Hernández, Naybell
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Hert, Carol A.
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Hew, Khe Foon
knowledge sharing in online environments: a qualitative case study, 2310–2324
Hjørland, Birger
information: objective or subjective/situational?, 1448–1456
Hong, Weiyin
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482
Horri, Abbas
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
tracking open access journals evolution: some considerations in open access data collection validation, 1578–1585
Hota, Sobhan Raj
stylistic text classification using functional lexical features, 802–822
Hu, Ning
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
Huang, Chun-Yao
characterizing Web users' online information behavior, 1988–1997
Huang, Haiyan
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
Huang, Jimmy
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
Huang, Xiangji
personalized recommendation with adaptive mixture of Markov models, 1851–1870
Hung, Chen-Ming
Web-based text classification in the absence of manually labeled training documents, 88–96
Hurtado, Carlos
improving search engines by query clustering, 1793–1804
Hutchinson, Hilary Browne
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
Iyer, Hemalata
prioritization strategies for video storyboard keyframes, 629–644
Jacobs, Donald
the impact of youth's use of the Internet on their use of the public library, 2180–2197
Jämsen, Janne
a query language for discovering semantic associations, part I: approach and formal definition of query primitives, 1559–1568
a query language for discovering semantic associations, part II: sample queries and query evaluation, 1686–1700
Jansen, Bernard J.
defining a session on Web search engines, 862–871

DOI: 10.1002/asi

Jansen, Bernard J. *(Continued)*
Web searcher interaction with the Dogpile.com metasearch engine, 744–755
Japzon, Andrea
[book review], 1909–1910
Järvelin, Kalervo
an analysis of two approaches in information retrieval: from frameworks to study designs, 971–986
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
Jensen, Eric C.
exploiting parallelism to support scalable hierarchical clustering, 1207–1221
temporal analysis of a very large topically categorized Web query log, 166–178
Johnson, Catherine A.
social capital and the search for information: examining the role of social capital in information seeking behavior in Mongolia, 883–894
Joinson, Adam N.
development of measures of online privacy concern and protection for use on the Internet, 157–165
Jones, Christopher
towards memory supporting personal information management tools, 924–946
Jörgensen, Corinne
the MPEG-7 Standard: multimedia description in theory and application, 1323–1328
semantic description in MPEG-7: the rich recursion of ripeness, 1338–1345
Ju, Boryung
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
Juhola, Martti
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
Juraga, Dubravka
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
Kajikawa, Yuya
topological analysis of citation networks to discover the future core articles, 872–882
Kang, Sanggil
automatic user preference learning for personalized electronic program guide applications, 1346–1356
Kantor, Paul
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043
Karamuftuoglu, Murat
need for a systemic theory of classification in information science, 1977–1987
Kari, Jarkko
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
Kaynak, Selcan
an analysis of the delayed response to Hurricane Katrina through the lens of knowledge management, 391–403
Keenoy, Kevin
user rankings of search engine results, 1254–1266
Kellar, Melanie
a field study characterizing Web-based information-seeking tasks, 999–1018
Kelly, Diane
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043
Kennedy, Cathleen A.
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Khoo, Christopher S. G.
automatic multidocument summarization of research abstracts: design and user evaluation, 1419–1435
Kiezer, Tamás
a measure theoretic approach to information retrieval, 1108–1122
Kim, Joonmin
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577
Kim, Munchurl
automatic user preference learning for personalized electronic program guide applications, 1346–1356
King, Irwin
the generalized dependency degree between attributes, 2280–2294
Kleinberg, Jon
the link-prediction problem for social networks, 1019–1031
Kniesner, Dan
integrating MPEG-7 into the Moving Image Collections Portal, 1357–1363
Knobloch-Westerwick, Silvia
news cues: information scent and cognitive heuristics, 366–378
Koike, Asako
knowledge discovery based on an implicit and explicit conceptual network, 51–65
Koshman, Sherry
defining a session on Web search engines, 862–871
Web searcher interaction with the Dogpile.com metasearch engine, 744–755
Kousha, Kayvan
Google Scholar citations and Google Web/URL citations: a multi-discipline exploratory analysis, 1055–1065
how is science cited on the Web? a classification of Google unique Web citations, 1631–1644
Ku, Lun-Wei
mining opinions from the Web: beyond relevance retrieval, 1838–1850
Lakshminarayana, S.
quality search content: a reality with next generation browsers [letter to the editor], 1223
Lam, Wai
introduction to the special topic section on mining Web resources for enhancing information retrieval, 1791–1792
Lapinski, P. Scott
[book review], 908–909
Large, Andrew
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
Laurikkala, Jorma
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
Law, Effie Lai-Chong
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
Lazarinis, Fotis
engineering and utilizing a stopword list in Greek Web retrieval, 1645–1652
Lee, Matthew
understanding user acceptance of multimedia messaging services: an empirical study, 2066–2077
Leide, John E.
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
Levene, Mark
user rankings of search engine results, 1254–1266
Levitan, Shlomo
stylistic text classification using functional lexical features, 802–822
Lewis, Caitlain Devereaux
prioritization strategies for video storyboard keyframes, 629–644
Leydesdorff, Loet
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
a comparison between the *China Scientific and Technical Papers and Citations Database* and the *Science Citation Index* in terms of journal hierarchies and interjournal citation relations, 223–236
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
Li, Xuemei
which factors explain the Web impact of scientists' personal homepages?, 200–211
Liao, Jianxin
[book review], 1066–1067, 1705–1706, 2409–2410
Liben-Nowell, David
the link-prediction problem for social networks, 1019–1031
Lim, Jeen-Su
determining factors of academic library Web site usage, 2325–2334
Lim, Jeongyeon
automatic user preference learning for personalized electronic program guide applications, 1346–1356

DOI: 10.1002/asi

Lim, Kee-Sook
determining factors of academic library Web site usage, 2325–2334
Lim, Sook
do information technology units have more power than other units in academic libraries?, 1242–1253
Lin, Chen-Shun
characterizing Web users' online information behavior, 1988–1997
Lin, Yang
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
Liu, Chengliang
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998
Liu, Xiaohui
automatic cognitive style identification of digital library users for personalization, 237–251
Liu, Yang
personalized recommendation with adaptive mixture of Markov models, 1851–1870
Liu, Yiqun
data cleansing for Web information retrieval using query independent features, 1884–1898
Lorigo, Lori
frequency and structure of long distance scholarly collaborations in a physics community, 1497–1502
Lu, Dihui
information seeking behavior of academic scientists, 2206–2226
Lustria, Mia Liza A.
can interactivity make a difference? effects of interactivity on the comprehension of and attitudes toward online health content, 766–776
Lyu, Michael R.
the generalized dependency degree between attributes, 2280–2294
Ma, Hongyan
[book review], 455–456
Ma, Shaoping
data cleansing for Web information retrieval using query independent features, 1884–1898
Madden, Andrew
data mining of search engine logs, 2382–2400
Makri, Stephann
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
Markey, Karen
twenty-five years of end-user searching, part 1: research findings, 1071–1081
twenty-five years of end-user searching, part 2: future research directions, 1123–1130
Martínez, José
MPEG-7 tools for Universal Multimedia Access, 1374–1376
TV-Anytime Phase 1 and MPEG-7, 1367–1373
Marty, Paul F.
the changing nature of information work in museums, 97–107
Matsushima, Katsumori
topological analysis of citation networks to discover the future core articles, 872–882
McDonald, John D.
understanding journal usage: a statistical analysis of citation and use, 39–50
Meek, Colin
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
Meho, Lokman I.
impact of data sources on citation counts and rankings of LIS faculty: Web of Science *versus* Scopus and Google Scholar, 2105–2125
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
Melucci, Massimo
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686
Menczer, Filippo
introduction to the special topic section on mining Web resources for enhancing information retrieval, 1791–1792
Mendoza, Marcelo
improving search engines by query clustering, 1793–1804
Metzger, Miriam J.
making sense of credibility on the Web: models for evaluating online information and recommendations for future research, 2078–2091
Miksa, Shawne D.
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577
Moed, Henk F.
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054
Moffat, Alistair
block merging for off-line compression, 3–14
Moore, Joi L.
the search experience variable in information behavior research, 1529–1546
Morris, Steven A.
manifestation of research teams in journal literature: a growth model of papers, authors, collaboration, coauthorship, weak ties, and Lotka's law, 1764–1782
Moya-Anegón, Félix de
approximate personal name-matching through finite-state graphs, 1960–1976
visualizing the marrow of science, 2167–2179
Munoz-Fernández, Francisco J.
visualizing the marrow of science, 2167–2179
Nahl, Diane
social-biological information technology: an integrated conceptual framework, 2021–2046
Navarro, Gonzalo
Lempel-Ziv compression of highly structured documents, 461–478
Nayar, Pramod K.
[book review], 1222, 2407–2408
Neuman, Delia
high school students' information seeking and use for class projects, 1503–1517
Newell, Sue
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
Newman, Michael
information systems project post-mortems: insights from an attribution perspective, 2256–2269
Ng, Peng Kin
link decay in leading information science journals, 15–24
Nicholson, Scott
using lessons from health care to protect the privacy of library users: guidelines for the de-identification of library data based on HIPAA, 1198–1206
Niemi, Timo
a query language for discovering semantic associations, part I: approach and formal definition of query primitives, 1559–1568
a query language for discovering semantic associations, part II: sample queries and query evaluation, 1686–1700
O'Brien, Heather L.
[book review], 2402–2403
Oh, Jung Sun
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Oppenheim, Charles
using the *h*-index to rank influential British researchers in information science and librarianship, 297–301
Orio, Nicola
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686
Orme, Marianne
[book review], 2408–2409
Ou, Shiyan
automatic multidocument summarization of research abstracts: design and user evaluation, 1419–1435
Paine, Carina
development of measures of online privacy concern and protection for use on the Internet, 157–165
Pan, Gary
information systems project post-mortems: insights from an attribution perspective, 2256–2269
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
Pan, Shan L.
information systems project post-mortems: insights from an attribution perspective, 2256–2269
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
towards understanding the roles of social capital in knowledge integration: a case study of collaborative information systems project, 263–274

DOI: 10.1002/asi

Pardo, Bryan
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
Pardo, Theresa
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
Patra, Jagdish C.
user modeling for personalized Web search with self-organizing map, 494–507
Pattuelli, Maria Cristina
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Pellacini, Fabio
frequency and structure of long distance scholarly collaborations in a physics community, 1497–1502
Perkins, Louise A.
determining the context of text using augmented latent semantic indexing, 2198–2205
Perugini, Saverio
mining Web functional dependencies for flexible information access, 1805–1819
Petrou, Anastasis D.
[book review], 607–608, 909–910
Prabowo, Rudy
identifying and characterizing public science-related fears from RSS feeds, 379–390
Pyati, Ajit
diasporic information environments: reframing immigrant-focused information research, 1734–1744
Raghavan, Vijay V.
language-modeling kernel based approach for information retrieval, 2353–2365
Ramakrishnan, Naren
mining Web functional dependencies for flexible information access, 1805–1819
Reips, Ulf-Dietrich
development of measures of online privacy concern and protection for use on the Internet, 157–165
forced-response in online surveys: bias from reactance and an increase in sex-specific dropout, 1653–1660
Reuter, Kara
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
Rice, Ronald E.
predicting user concerns about online privacy, 710–722
Rimmer, Jon
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
Rishel, Tom
determining the context of text using augmented latent semantic indexing, 2198–2205

JASIST

JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE AND TECHNOLOGY

Subject Index to Volume 58

Abstracts and Abstracting
automatic multidocument summarization of research abstracts: design and user evaluation, 1419–1435
effects of spacing and titles on judgments of the effectiveness of structured abstracts, 2335–2340
prioritization strategies for video storyboard keyframes, 629–644
Academic Institutions. *See* Universities
Academic Libraries
determining factors of academic library Web site usage, 2325–2334
do information technology units have more power than other units in academic libraries?, 1242–1253
Academic Researchers. *See* Scholars
Access to Information. *See* Information Access
Active System for MPEG-4 Video Object Simulation (AMOS)
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
Activity Theory
the dynamics of interactive information retrieval behavior, part I: an activity theory perspective, 958–970
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998
Adaptive Technology
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Advertising
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482
Aesthetics
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
need for a systemic theory of classification in information science, 1977–1987
Affect
social-biological information technology: an integrated conceptual framework, 2021–2046
Age
reflections on the age distribution of Japanese scientists, 762 (erratum)
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
ALEKS
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Algorithms
automatic user preference learning for personalized electronic program guide applications, 1346–1356
block merging for off-line compression, 3–14
data cleansing for Web information retrieval using query independent features, 1884–1898
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686
determining the context of text using augmented latent semantic indexing, 2198–2205
exploiting parallelism to support scalable hierarchical clustering, 1207–1221
the generalized dependency degree between attributes, 2280–2294
improving search engines by query clustering, 1793–1804
mining opinions from the Web: beyond relevance retrieval, 1838–1850
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
mining Web data for Chinese segmentation, 1820–1837
mining Web functional dependencies for flexible information access, 1805–1819
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)
personalized recommendation with adaptive mixture of Markov models, 1851–1870
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
visualizing the marrow of science, 2167–2179
Web-based text classification in the absence of manually labeled training documents, 88–96
America Online Web Search Service
temporal analysis of a very large topically categorized Web query log, 166–178
American Chemical Society
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
Analysis of Variance
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
Animation
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482
Aposiopesis
democratic theory in library information science: toward an emendation, 1483–1496
Archiving
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296
Art
need for a systemic theory of classification in information science, 1977–1987
Arts and Humanities Citation Index
visualizing the marrow of science, 2167–2179
ArXiv.org
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054
Assessment Approaches
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Association Rules
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
Attorneys
information technology support for communities of practice: how public defenders learn about winning and losing in court, 76–87
Attributes
the generalized dependency degree between attributes, 2280–2294
Attribution Theory
information systems project post-mortems: insights from an attribution perspective, 2256–2269
Audiovisual Data. *See* MPEG-7 Standard
Augmented Seriation Software
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
Authors and Authorship
approximate personal name-matching through finite-state graphs, 1960–1976
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054
frequency and structure of long distance scholarly collaborations in a physics community, 1497–1502
impact of data sources on citation counts and rankings of LIS faculty: Web of Science *versus* Scopus and Google Scholar, 2105–2125
keywords given by authors of scientific articles in database descriptors, 1175–1187
the link-prediction problem for social networks, 1019–1031
manifestation of research teams in journal literature: a growth model of papers, authors, collaboration, coauthorship, weak ties, and Lotka's law, 1764–1782
a mathematical theory of citing, 1661–1673
multiple publication on a single research study: does it pay? the influence of number of research articles on total citation counts in biomedicine, 1100–1107
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
using the *h*-index to rank influential British researchers in information science and librarianship, 297–301
what do we know about the *h* index?, 1381–1385

Authors and Authorship *(Continued)*
when do researchers collaborate? Toward a model of collaboration propensity, 2227–2240

Automatic Classification. ***See*** **Classification**

Axiological Model
need for a systemic theory of classification in information science, 1977–1987

Bag of Words Paradigm
need for a systemic theory of classification in information science, 1977–1987

Barriers
knowledge sharing in online environments: a qualitative case study, 2310–2324

Bates, Marcia
information: objective or subjective/situational?, 1448–1456
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959

Bayes Classifier, Naive
Web-based text classification in the absence of manually labeled training documents, 88–96

Bayesian Network
automatic user preference learning for personalized electronic program guide applications, 1346–1356

Behavioral Control
punishment and ethics deterrents: a study of insider security contravention, 212–222

Belkin, Nicholas
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959

Berkeley Evaluation & Assessment Research Center Assessment System
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309

Betweenness Centrality
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
topological analysis of citation networks to discover the future core articles, 872–882

Bias
forced-response in online surveys: bias from reactance and an increase in sex-specific dropout, 1653–1660

Bibliographic Records
link decay in leading information science journals, 15–24
a system for supporting evidence recording in bibliographic records, part II: what is valuable evidence for catalogers?, 823–841

Bibliometrics. ***See also*** **Citation Analysis; Informetrics; Webometrics**
assessing the value of a journal beyond the impact factor, 1148–1161
combining bibliometrics, information retrieval, and relevance theory, part 1: first examples of a synthesis, 536–559
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605
dynamic *h*-index: the Hirsch index in function of time, 452–454
the impact of survey data: measuring success, 190–199
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
on the robustness of the *h*-index, 1547–1550
structure of the impact factor of journals included in the *Social Sciences Citation Index:* citations from documents labeled "editorial material," 252–262
understanding journal usage: a statistical analysis of citation and use, 39–50
using the *h*-index to rank influential British researchers in information science and librarianship, 297–301
what do we know about the *h* index?, 1381–1385

Bilingual Information Retrieval. ***See*** **Cross-Language Information Retrieval**

Biodiversity
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149

Biological Information Technology
social-biological information technology: an integrated conceptual framework, 2021–2046

Biomedical Literature
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352
information seeking behavior of academic scientists, 2206–2226
knowledge discovery based on an implicit and explicit conceptual network, 51–65
multiple publication on a single research study: does it pay? the influence of number of research articles on total citation counts in biomedicine, 1100–1107
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149

BioTermNet System
knowledge discovery based on an implicit and explicit conceptual network, 51–65

Block Merging
block merging for off-line compression, 3–14

Book Reviews
The Access Principle: The Case for Open Access to Research and Scholarship (John Willinsky), 1386
Blogging and RSS: A Librarian's Guide (Michael P. Sauers), 2160–2161
Computer Models of Musical Creativity (David Cope), 1553–1555
Covert and Overt: Recollecting and Connecting Intelligence Service and Information Science (Robert V. Williams and Ben-Ami Lipetz, Eds.), 303–305
Design and Usability of Digital Libraries: Case Studies in the Asia Pacific (Yin-Leng Theng and Schubert Foo), 152–153
Exploring Information Systems Research Approaches: Readings and Reflections (Robert D. Galliers, M. Lynne Markus, and Sue Newell, Eds.), 2402–2403
Fuzzy Logic and the Semantic Web (Elie Sanchez, Ed.), 2409–2410
Georeferencing: The Geographic Associations of Information (Linda L. Hill, Ed.), 2401–2402
Human–Machine Reconfigurations: Plans and Situated Actions, 2nd ed. (Lucy Suchman), 2404–2405
Human Perspectives in the Internet Society: Culture, Psychology and Gender (K. Morgan, C.A. Brebbia, J. Sanchez, and A. Voiskounsky, Eds.), 150–151
Human Rights in the Global Information Society (Rikke Frank Jørgensen, Ed.), 2407–2408
The IMS: IP Multimedia Concepts and Services in the Mobile Domain (Miikka Poikselkä, Georg Mayer, Hisham Khartabil, and Aki Niemi), 1705–1706
Information Ethics: Privacy, Property, and Power (Adam D. Moore, Ed.), 302
Information Politics on the Web (Richard Rogers), 608–609
The Information Revolution and Ireland: Prospects and Challenges (Lee Komito), 760–761
The Internet Imaginaire (Patrice Flichy), 2405–2407
Introducing Information Management: An Information Research Reader (Elena Macevičiūtė and T.D. Wilson, Eds.), 607–608
Managing Information Technology: A Handbook for Systems Librarians (Patricia Ingersoll and John Culshaw), 908–909
Media Ecologies: Materialist Energies in Art and Technoculture (Matthew Fuller), 1222
Metadata and Its Impact on Libraries (Sheila S. Intner, Susan S. Lazinger, and Jean Weihs), 909–910
Multimedia Content and Semantic Web: Methods, Standards and Tools (Giorgos Stamou and Stefanos Kollias, Eds.), 457–458
New Directions in Cognitive Information Retrieval (Amanda Spink and Charles Cole, Eds.), 758–760
New Directions in Human Information Behavior (Amanda Spink and Charles Cole, Eds.), 1553
Process-Aware Information Systems: Bridging People and Software Through Process Technology (Marlon Dumas, Wil van der Aalst, and Arthur H.M. ter Hofstede, Eds.), 455–456
Radio Frequency Identification Handbook for Librarians (Connie K. Haley, Lynne A. Jacobsen, and Shai Robkin), 2408–2409
Spanning the Theory-Practice Divide in Library and Information Science (Bill Crowley), 606–607
Stimulated Recall and Mental Models: Tools for Teaching and Learning Computer Information Literacy (Lyn Henderson and Julie Tallman), 456–457
Theories of Information Behavior (Karen E. Fisher, Sanda Erdelez, and Lynne (E.F.) McKechnie, Eds.), 303
TREC: Experiment and Evaluation in Information Retrieval (Ellen M. Voorhees and Donna K. Harman, Eds.), 910–911
Uncertainty and Information: Foundations of Generalized Information Theory (George J. Klir), 756–758

DOI: 10.1002/asi

Book Reviews *(Continued)*
Understanding and Communicating Social Informatics: A Framework for Studying and Teaching the Human Contexts of Information and Communication Technologies (Rob Kling, Howard Rosenbaum, and Steve Sawyer), 151–152
Web Usability: A User-Centered Design Approach (Jonathan Lazar), 1066–1067
What They Didn't Tell You About Knowledge Management (Jay Liebowitz), 1909–1910
Women and Information Technology: Research on Underrepresentation (J. McGrath Cohoon and William Aspray, Eds.), 1704
Book Selection
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
Boolean Operators
twenty-five years of end-user searching, part 1: research findings, 1071–1081
Branching Process
a mathematical theory of citing, 1661–1673
Brille's Part-of-Speech Tagger
determining the context of text using augmented latent semantic indexing, 2198–2205
Brosio, Richard
democratic theory in library information science: toward an emendation, 1483–1496
Browsers
a field study characterizing Web-based information-seeking tasks, 999–1018
quality search content: a reality with next generation browsers [letter to the editor], 1223
Browsing
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617
Brunel Library Catalogue
automatic cognitive style identification of digital library users for personalization, 237–251
Buckshot Algorithm
exploiting parallelism to support scalable hierarchical clustering, 1207–1221
Business and Businesses
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365
towards understanding the roles of social capital in knowledge integration: a case study of collaborative information systems project, 263–274
C4.5 Algorithm
the generalized dependency degree between attributes, 2280–2294
CAB ***(Current Agriculture Bibliography)***
keywords given by authors of scientific articles in database descriptors, 1175–1187
Canadian National Population Health Survey
the impact of survey data: measuring success, 190–199
Cataloging
description and search labor for information retrieval, 1783–1790
integrating MPEG-7 into the Moving Image Collections Portal, 1357–1363
a system for supporting evidence recording in bibliographic records, part II: what is valuable evidence for catalogers?, 823–841
Catastrophic Events. ***See*** **Disaster Management; Disasters**
Central Capacity Theory
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482
Central Europe
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
Centrality Measures
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
topological analysis of citation networks to discover the future core articles, 872–882
Changes in Information
a framework for information quality assessment, 1720–1733
Chemists
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
Chernobyl Nuclear Disaster
the publishing dynamics of catastrophic events, 856–861
Child Pornography
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451
Children. ***See also*** **Students**
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
children as architects of Web directories: an exploratory study, 895–907
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
China
a comparison between the *China Scientific and Technical Papers and Citations Database* and the *Science Citation Index* in terms of journal hierarchies and inter-journal citation relations, 223–236
reflections on the age distribution of Japanese scientists, 762 (erratum)
Chinese
data cleansing for Web information retrieval using query independent features, 1884–1898
mining opinions from the Web: beyond relevance retrieval, 1838–1850
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
mining Web data for Chinese segmentation, 1820–1837
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054
Citation Analysis. ***See also*** **Webometrics**
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
can citation analysis of Web publications better detect research fronts?, 1285–1302
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957
citation data analysis on hydrogeology, 518–525
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
a comparison between the *China Scientific and Technical Papers and Citations Database* and the *Science Citation Index* in terms of journal hierarchies and inter-journal citation relations, 223–236
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054
the impact factor, total citations, and better citation mouse traps: a commentary, 1904–1908
the impact of survey data: measuring success, 190–199
a mathematical theory of citing, 1661–1673
matrix comparison, part 1: motivation and important issues for measuring the resemblance between proximity measures or ordination results, 1586–1595
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
some comments on the question whether co-occurrence data should be normalized, 1701–1703
structure of the impact factor of journals included in the *Social Sciences Citation Index*: citations from documents labeled "editorial material," 252–262
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
topological analysis of citation networks to discover the future core articles, 872–882
understanding journal usage: a statistical analysis of citation and use, 39–50
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
visualizing the marrow of science, 2167–2179
what do we know about the *h* index?, 1381–1385
Citations
assessing the value of a journal beyond the impact factor, 1148–1161

DOI: 10.1002/asi

determining the context of text using augmented latent semantic indexing, 2198–2205
Contrast Model
relationships between perceived features and similarity of images: a test of Tversky's contrast model, 1401–1418
Co-occurrence Analysis
automated criminal link analysis based on domain knowledge, 842–855
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
Copyright Transfer Agreements
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296
Corpora. *See also* Test Collections; TREC Test Collection
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Web-based text classification in the absence of manually labeled training documents, 88–96
Corporations. *See* Organizations
Correlation Analysis
data mining of search engine logs, 2382–2400
Costs
the impact of survey data: measuring success, 190–199
information policies and open source software in developing countries, 121–132
institutional journal costs in an open access environment, 108–120
Creativity
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
Credibility of Information
making sense of credibility on the Web: models for evaluating online information and recommendations for future research, 2078–2091
Crime-Psychology Literature
the impact factor, total citations, and better citation mouse traps: a commentary, 1904–1908
Criminal Link Analysis
automated criminal link analysis based on domain knowledge, 842–855
Critical Delphi Study
classification schemes of information science: twenty-eight scholars map the field, 645–672
conceptions of information science, 335–350
conceptual approaches for defining data, information, and knowledge, 479–493
knowledge map of information science, 526–535
Critical Informatics
Kling and the "critical": social informatics and critical informatics, 575–582
Cronin, Blaise
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
Cross-Cultural Environment
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
Cross-Disciplinary Research
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
Cross-Language Information Retrieval
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
CubyHum Matcher
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
Cues
news cues: information scent and cognitive heuristics, 366–378
Culture
ethnomethodological architectures: information systems driven by cultural and community visions, 723–733
***Current Agriculture Bibliography* (CAB)**
keywords given by authors of scientific articles in database descriptors, 1175–1187
Darwinian Fitness
a mathematical theory of citing, 1661–1673
Data
conceptual approaches for defining data, information, and knowledge, 479–493
the impact of survey data: measuring success, 190–199
Data Cleansing Algorithm
data cleansing for Web information retrieval using query independent features, 1884–1898
Data Compression
block merging for off-line compression, 3–14
Lempel-Ziv compression of highly structured documents, 461–478
Data Mining. *See also* Web Mining
citation data analysis on hydrogeology, 518–525
data mining of search engine logs, 2382–2400
the generalized dependency degree between attributes, 2280–2294
knowledge discovery based on an implicit and explicit conceptual network, 51–65
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Data Structure
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Data Values
a system for supporting evidence recording in bibliographic records, part II: what is valuable evidence for catalogers?, 823–841
Database Indexing
description and search labor for information retrieval, 1783–1790
Decision Making
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
information systems project post-mortems: insights from an attribution perspective, 2256–2269
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
Decision Trees
the generalized dependency degree between attributes, 2280–2294
DELTA (Description Language of Taxonomy)
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Democratic Theory
democratic theory in library information science: toward an emendation, 1483–1496
Dependency Degree
the generalized dependency degree between attributes, 2280–2294
Description Labor
description and search labor for information retrieval, 1783–1790
Description Schemes. *See* MPEG-7 Standard
Design
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
Deterministic Rules
the generalized dependency degree between attributes, 2280–2294
Deterrence Theory
punishment and ethics deterrents: a study of insider security contravention, 212–222
Developing Nations
information policies and open source software in developing countries, 121–132
Deviant Behavior
punishment and ethics deterrents: a study of insider security contravention, 212–222
Diaries
towards memory supporting personal information management tools, 924–946
Diasporic Information Environment Model
diasporic information environments: reframing immigrant-focused information research, 1734–1744
Digital Libraries
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
automatic cognitive style identification of digital library users for personalization, 237–251
impact of research cultures on the use of digital libraries, 1674–1685
information seeking behavior of academic scientists, 2206–2226

DOI: 10.1002/asi

Digital Libraries *(Continued)*
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 1, 1162–1174

Digital Media
diasporic information environments: reframing immigrant-focused information research, 1734–1744

Direct Impact Model
determining factors of academic library Web site usage, 2325–2334

Directories
children as architects of Web directories: an exploratory study, 895–907
tracking open access journals evolution: some considerations in open access data collection validation, 1578–1585

Disambiguation
approximate personal name-matching through finite-state graphs, 1960–1976
a framework for information quality assessment, 1720–1733

Disaster Management
an analysis of the delayed response to Hurricane Katrina through the lens of knowledge management, 391–403
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
a tale of two hurricanes: comparing Katrina and Rita through a knowledge management perspective, 1518–1528

Disasters
the publishing dynamics of catastrophic events, 856–861

Dissertation Abstracts
automatic multidocument summarization of research abstracts: design and user evaluation, 1419–1435

Distance Education
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75

Distributed Memory Systems
exploiting parallelism to support scalable hierarchical clustering, 1207–1221

Divided Attention Theory
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482

Documents. *See* Electronic Documents

Dogpile.com
defining a session on Web search engines, 862–871
Web searcher interaction with the Dopile.com metasearch engine, 744–755

Domain Knowledge
automated criminal link analysis based on domain knowledge, 842–855
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
need for a systemic theory of classification in information science, 1977–1987
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
twenty-five years of end-user searching, part 2: future research directions, 1123–1130

Domestic Violence
digital information support for domestic violence victims, 420–432

Dropout
forced-response in online surveys: bias from reactance and an increase in sex-specific dropout, 1653–1660

Drug Information
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617

Dual Mediation Impact Model
determining factors of academic library Web site usage, 2325–2334

Dublin Core Element Set
integrating MPEG-7 into the Moving Image Collections Portal, 1357–1363

E-Learning. *See* Distance Education

Ecological Constructionism Framework
social-biological information technology: an integrated conceptual framework, 2021–2046

Editorial Material
structure of the impact factor of journals included in the *Social Sciences Citation Index:* citations from documents labeled "editorial material," 252–262

Education and Learning. *See also* Machine Learning
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451
knowledge sharing in online environments: a qualitative case study, 2310–2324

Egghe, Leo
on Egghe's construction of Lorenz curves, 1551–1552
Egghe's construction of Lorenz curves resolved, 2157–2159

Electronic Communication. *See also* Communication; Scholarly Communication
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
knowledge sharing in online environments: a qualitative case study, 2310–2324

Electronic Documents
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
making sense of credibility on the Web: models for evaluating online information and recommendations for future research, 2078–2091
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
Web-based text classification in the absence of manually labeled training documents, 88–96

Electronic Journals
assessing the value of a journal beyond the impact factor, 1148–1161
can citation analysis of Web publications better detect research fronts?, 1285–1302
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054
Google Scholar citations and Google Web/URL citations: a multi-discipline exploratory analysis, 1055–1065
how is science cited on the Web? a classification of Google unique Web citations, 1631–1644
impact of research cultures on the use of digital libraries, 1674–1685
information seeking behavior of academic scientists, 2206–2226
institutional journal costs in an open access environment, 108–120
link decay in leading information science journals, 15–24
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296
tracking open access journals evolution: some considerations in open access data collection validation, 1578–1585
understanding journal usage: a statistical analysis of citation and use, 39–50

Electronic Libraries. *See* Digital Libraries

Electronic Program Guide
automatic user preference learning for personalized electronic program guide applications, 1346–1356

Elementary-Age Children
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630

Emotion
social-biological information technology: an integrated conceptual framework, 2021–2046

DOI: 10.1002/asi

Encoding
data mining of search engine logs, 2382–2400
End-User Searchers. *See also* Searching; Web Searching
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
making sense of credibility on the Web: models for evaluating online information and recommendations for future research, 2078–2091
the search experience variable in information behavior research, 1529–1546
twenty-five years of end-user searching, part 1: research findings, 1071–1081
twenty-five years of end-user searching, part 2: future research directions, 1123–1130
English
language as power on the Internet, 1899–1903
Enterprise Resource Planning
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
Entropy-Based Information Retrieval
a measure theoretic approach to information retrieval, 1108–1122
Environmental Activists
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719
Epistemic Information Search
relevance judgment in epistemic and hedonic information searches, 179–189
Equal-Revenue Open Access Model
institutional journal costs in an open access environment, 108–120
Essays
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
Ethics Training
punishment and ethics deterrents: a study of insider security contravention, 212–222
Ethnography
ethnomethodological architectures: information systems driven by cultural and community visions, 723–733
information technology support for communities of practice: how public defenders learn about winning and losing in court, 76–87
order from chaos: the poetics and pragmatics of scientific recordkeeping, 1457–1466
Europe. *See also* United Kingdom
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
which factors explain the Web impact of scientists' personal homepages?, 200–211
Evaluation Methods
assessing the value of a journal beyond the impact factor, 1148–1161
determining factors of academic library Web site usage, 2325–2334
making sense of credibility on the Web: models for evaluating online information and recommendations for future research, 2078–2091
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043
Everyday Life
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719
Evidence
a system for supporting evidence recording in bibliographic records, part II: what is valuable evidence for catalogers?, 823–841
Excite
data mining of search engine logs, 2382–2400
Facet Analysis System
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577
Faceted Classification
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006
Fear
identifying and characterizing public science-related fears from RSS feeds, 379–390
Fidel, Raya
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
Finite-State Graphs
approximate personal name-matching through finite-state graphs, 1960–1976
Finnish
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
Finnish Electronic Library
impact of research cultures on the use of digital libraries, 1674–1685
Forced-Response
forced-response in online surveys: bias from reactance and an increase in sex-specific dropout, 1653–1660
FOSS (Full-Option Science System) Self-Assessment System
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
Freenet
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451
Full-Text Searching
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352
Functional Lexical Features
stylistic text classification using functional lexical features, 802–822
Fuzzy Set Theory
a measure theoretic approach to information retrieval, 1108–1122
Garfield, Eugene
the impact factor, total citations, and better citation mouse traps: a commentary, 1904–1908
Gender
forced-response in online surveys: bias from reactance and an increase in sex-specific dropout, 1653–1660
predicting user concerns about online privacy, 710–722
Generalized Dependency Degree
the generalized dependency degree between attributes, 2280–2294
Genes
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352
Geographic Information Technology
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
Global Climate Change
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
Globalization
diasporic information environments: reframing immigrant-focused information research, 1734–1744
Goals, Operators, Methods, and Selection Rules (GOMS)
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
Google
engineering and utilizing a stopword list in Greek Web retrieval, 1645–1652
how is science cited on the Web? a classification of Google unique Web citations, 1631–1644
user rankings of search engine results, 1254–1266
Google Scholar
Google Scholar citations and Google Web/URL citations: a multi-discipline exploratory analysis, 1055–1065
impact of data sources on citation counts and rankings of LIS faculty: Web of Science *versus* Scopus and Google Scholar, 2105–2125
the impact of survey data: measuring success, 190–199
Great Britain. *See* United Kingdom
Greek
engineering and utilizing a stopword list in Greek Web retrieval, 1645–1652
Green, Maxine
democratic theory in library information science: toward an emendation, 1483–1496
Gutmann, Amy
democratic theory in library information science: toward an emendation, 1483–1496

DOI: 10.1002/asi

h-Index
dynamic *h*-index: the Hirsch index in function of time, 452–454
on the robustness of the *h*-index, 1547–1550
using the *h*-index to rank influential British researchers in information science and librarianship, 297–301
what do we know about the *h* index?, 1381–1385

Habermas, Jürgen
democratic theory in library information science: toward an emendation, 1483–1496

Health Care Systems
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
using lessons from health care to protect the privacy of library users: guidelines for the de-identification of library data based on HIPAA, 1198–1206

Health Information
can interactivity make a difference? effects of interactivity on the comprehension of and attitudes toward online health content, 766–776
digital information support for domestic violence victims, 420–432
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617

Health Insurance Portability and Accountability Act (HIPAA)
using lessons from health care to protect the privacy of library users: guidelines for the de-identification of library data based on HIPAA, 1198–1206

Heaps' Law
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709

Hedonic Information Search
relevance judgment in epistemic and hedonic information searches, 179–189

Herdan's Law
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709

Heuristics
news cues: information scent and cognitive heuristics, 366–378

Hidden Markov Models (HMMs)
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686

Hierarchical Agglomerative Clustering Algorithm
exploiting parallelism to support scalable hierarchical clustering, 1207–1221

Hierarchical Structure
children as architects of Web directories: an exploratory study, 895–907

High-Quality Interactive Question Answering (HITIQA) System
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043

High School Students
high school students' information seeking and use for class projects, 1503–1517

Higher Things in Life
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147

HIPAA (Health Insurance Portability and Accountability Act)
using lessons from health care to protect the privacy of library users: guidelines for the de-identification of library data based on HIPAA, 1198–1206

Hirsch Index. ***See h*-Index**

History
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104

Homepages. ***See* Web Pages and Web Sites**

Hong Kong
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054

Human-Computer Interaction
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
social-biological information technology: an integrated conceptual framework, 2021–2046

Humanists
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279

Hurricanes Katrina and Rita
an analysis of the delayed response to Hurricane Katrina through the lens of knowledge management, 391–403
a tale of two hurricanes: comparing Katrina and Rita through a knowledge management perspective, 1518–1528

Hydrogeology
citation data analysis on hydrogeology, 518–525

Hyperlinks. ***See* Links and Link Analysis**

Identity
information technology support for communities of practice: how public defenders learn about winning and losing in court, 76–87
the proximal-virtual team continuum: a study of performance, 794–801
using lessons from health care to protect the privacy of library users: guidelines for the de-identification of library data based on HIPAA, 1198–1206

Ideology
information, analysis, and ideology: a case study of science and the public interest, 2366–2371

Images. ***See also* MPEG-7 Standard**
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617
relationships between perceived features and similarity of images: a test of Tversky's contrast model, 1401–1418

Immigrants
diasporic information environments: reframing immigrant-focused information research, 1734–1744

Impact Factors
assessing the value of a journal beyond the impact factor, 1148–1161
the impact factor, total citations, and better citation mouse traps: a commentary, 1904–1908
structure of the impact factor of journals included in the *Social Sciences Citation Index:* citations from documents labeled "editorial material," 252–262
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
which factors explain the Web impact of scientists' personal homepages?, 200–211

Index Terms
keywords given by authors of scientific articles in database descriptors, 1175–1187
need for a systemic theory of classification in information science, 1977–1987
prioritization strategies for video storyboard keyframes, 629–644

Indexes and Indexing
analogies between linguistics and information theory, 309–321
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605
description and search labor for information retrieval, 1783–1790
linguistics and information theory: analytic advantages, 275–285
need for a systemic theory of classification in information science, 1977–1987
prioritization strategies for video storyboard keyframes, 629–644
selection power and selection labor for information retrieval, 915–923

Inference
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933
relevance: a review of the literature and framework for thinking on the notion in information science. part III: behavior and effects of relevance, 2126–2144

Information
conceptual approaches for defining data, information, and knowledge, 479–493
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147

Information Access
digital information support for domestic violence victims, 420–432
institutional journal costs in an open access environment, 108–120
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
understanding journal usage: a statistical analysis of citation and use, 39–50

DOI: 10.1002/asi

Information Architecture
children as architects of Web directories: an exploratory study, 895–907
ethnomethodological architectures: information systems driven by cultural and community visions, 723–733
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Information Arts
need for a systemic theory of classification in information science, 1977–1987
Information Environment
diasporic information environments: reframing immigrant-focused information research, 1734–1744
Information Generation
order from chaos: the poetics and pragmatics of scientific recordkeeping, 1457–1466
Information Management. ***See also*** **Knowledge Management**
the changing nature of information work in museums, 97–107
Information Policy
information policies and open source software in developing countries, 121–132
Information Professionals. ***See*** **Information Workers**
Information Quality. ***See*** **Quality of Information**
Information Retrieval. ***See also*** **Information-Seeking Behavior; Searching; User Interfaces; Web Searching**
an analysis of two approaches in information retrieval: from frameworks to study designs, 971–986
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
combining bibliometrics, information retrieval, and relevance theory, part 1: first examples of a synthesis, 536–559
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
description and search labor for information retrieval, 1783–1790
determining the context of text using augmented latent semantic indexing, 2198–2205
the dynamics of interactive information retrieval behavior, part I: an activity theory perspective, 958–970
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
language-modeling kernel based approach for information retrieval, 2353–2365
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
linguistics and information theory: analytic advantages, 275–285
a measure theoretic approach to information retrieval, 1108–1122
MPEG-7 in practice: analysis of a television news retrieval application, 1364–1366
need for a systemic theory of classification in information science, 1977–1987
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933
relevance: a review of the literature and framework for thinking on the notion in information science. part III: behavior and effects of relevance, 2126–2144
selection power and selection labor for information retrieval, 915–923
statistical principal components analysis for retrieval experiments, 560–574
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
towards memory supporting personal information management tools, 924–946
twenty-five years of end-user searching, part 1: research findings, 1071–1081
twenty-five years of end-user searching, part 2: future research directions, 1123–1130
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709
Information Retrieval Systems
an analysis of two approaches in information retrieval: from frameworks to study designs, 971–986
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
the dynamics of interactive information retrieval behavior, part I: an activity theory perspective, 958–970
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
twenty-five years of end-user searching, part 1: research findings, 1071–1081
twenty-five years of end-user searching, part 2: future research directions, 1123–1130
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043
Information Science
classification schemes of information science: twenty-eight scholars map the field, 645–672
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605
conceptions of information science, 335–350
conceptual approaches for defining data, information, and knowledge, 479–493
democratic theory in library information science: toward an emendation, 1483–1496
the double role of ontologies in information science research, 786–793
impact of data sources on citation counts and rankings of LIS faculty: Web of Science *versus* Scopus and Google Scholar, 2105–2125
information: objective or subjective/situational?, 1448–1456
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
knowledge map of information science, 526–535
need for a systemic theory of classification in information science, 1977–1987
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933
relevance: a review of the literature and framework for thinking on the notion in information science. part III: behavior and effects of relevance, 2126–2144
social-biological information technology: an integrated conceptual framework, 2021–2046
understanding information related fields: a conceptual framework, 1934–1947
using the *h*-index to rank influential British researchers in information science and librarianship, 297–301
Information Science and Technology Abstracts **(ISTA)**
keywords given by authors of scientific articles in database descriptors, 1175–1187
Information Science Literature
assessing the value of a journal beyond the impact factor, 1148–1161
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
link decay in leading information science journals, 15–24
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296
Information Security
punishment and ethics deterrents: a study of insider security contravention, 212–222
Information-Seeking Behavior
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957

DOI: 10.1002/asi

Information-Seeking Behavior *(Continued)*
characterizing Web users' online information behavior, 1988–1997
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
diasporic information environments: reframing immigrant-focused information research, 1734–1744
digital information support for domestic violence victims, 420–432
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
the dynamics of interactive information retrieval behavior, part I: an activity theory perspective, 958–970
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998
a field study characterizing Web-based information-seeking tasks, 999–1018
high school students' information seeking and use for class projects, 1503–1517
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
information seeking behavior of academic scientists, 2206–2226
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
relevance: a review of the literature and framework for thinking on the notion in information science. part III: behavior and effects of relevance, 2126–2144
relevance judgment in epistemic and hedonic information searches, 179–189
the search experience variable in information behavior research, 1529–1546
social capital and the search for information: examining the role of social capital in information seeking behavior in Mongolia, 883–894
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 1, 1162–1174
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 2, 1188–1197
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054
Information Sources
diasporic information environments: reframing immigrant-focused information research, 1734–1744
high school students' information seeking and use for class projects, 1503–1517
impact of research cultures on the use of digital libraries, 1674–1685
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
social capital and the search for information: examining the role of social capital in information seeking behavior in Mongolia, 883–894
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 2, 1188–1197
Information Systems
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
the double role of ontologies in information science research, 786–793
ethnomethodological architectures: information systems driven by cultural and community visions, 723–733
information systems project post-mortems: insights from an attribution perspective, 2256–2269
selection power and selection labor for information retrieval, 915–923
Information Systems Research **(ISR)**
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
Information Technology
the changing nature of information work in museums, 97–107
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
determining factors of academic library Web site usage, 2325–2334
do information technology units have more power than other units in academic libraries?, 1242–1253
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
information policies and open source software in developing countries, 121–132
information technology support for communities of practice: how public defenders learn about winning and losing in court, 76–87
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933
Information Theory
analogies between linguistics and information theory, 309–321
information: objective or subjective/situational?, 1448–1456
linguistics and information theory: analytic advantages, 275–285
Information Transfer
the impact of survey data: measuring success, 190–199
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
Information Visualization
combining bibliometrics, information retrieval, and relevance theory, part 1: first examples of a synthesis, 536–559
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
visualizing the marrow of science, 2167–2179
Information Workers
the changing nature of information work in museums, 97–107
do information technology units have more power than other units in academic libraries?, 1242–1253
Informetrics. ***See also*** **Bibliometrics; Webometrics**
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957
matrix comparison, part 1: motivation and important issues for measuring the resemblance between proximity measures or ordination results, 1586–1595
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709
Innovation
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
InsightXplore Limited
characterizing Web users' online information behavior, 1988–1997
INSPEC (Information Service for Physics, Engineering, and Computing)
keywords given by authors of scientific articles in database descriptors, 1175–1187
Integral Calculus
a measure theoretic approach to information retrieval, 1108–1122
Intelligent Multimedia Knowledge Application (IMKA)
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
Interactive Information Retrieval
the dynamics of interactive information retrieval behavior, part I: an activity theory perspective, 958–970
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043
Interactivity
can interactivity make a difference? effects of interactivity on the comprehension of and attitudes toward online health content, 766–776
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577

DOI: 10.1002/asi

Interdisciplinarity
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
frequency and structure of long distance scholarly collaborations in a physics community, 1497–1502
impact of research cultures on the use of digital libraries, 1674–1685
understanding information related fields: a conceptual framework, 1934–1947

Interfaces. *See* User Interfaces

International Children's Digital Library
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630

Internet and World Wide Web. *See also* Web Pages and Web Sites
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
can interactivity make a difference? effects of interactivity on the comprehension of and attitudes toward online health content, 766–776
the development of a facet analysis system to identify and measure the dimensions of interaction in online learning, 1569–1577
development of measures of online privacy concern and protection for use on the Internet, 157–165
diasporic information environments: reframing immigrant-focused information research, 1734–1744
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
the impact of time constraints on Internet and Web use, 508–517
the impact of youth's use of the Internet on their use of the public library, 2180–2197
language as power on the Internet, 1899–1903
predicting user concerns about online privacy, 710–722
Web-based text classification in the absence of manually labeled training documents, 88–96

Interreg Crossborder Program
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75

Interviews
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043

ISI. *See* Thomson Scientific

Israel
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279

ISTA (*Information Science and Technology Abstracts*)
keywords given by authors of scientific articles in database descriptors, 1175–1187

Japan
reflections on the age distribution of Japanese scientists, 762 (erratum)

Jewish Studies
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279

Joint Information Systems Committee (JISC)
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 1, 1162–1174
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 2, 1188–1197

Journal Analysis. *See also* Bibliometrics; Citation Analysis
assessing the value of a journal beyond the impact factor, 1148–1161
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447
the impact factor, total citations, and better citation mouse traps: a commentary, 1904–1908

Journal Citation Reports
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
visualizing the marrow of science, 2167–2179

Journal Collections
institutional journal costs in an open access environment, 108–120

Journal Hierarchies
a comparison between the *China Scientific and Technical Papers and Citations Database* and the *Science Citation Index* in terms of journal hierarchies and inter-journal citation relations, 223–236

Journal Impact Factors. *See* Impact Factors

***Journal of Education for Library and Information Science* (JELIS)**
assessing the value of a journal beyond the impact factor, 1148–1161

***Journal of the American Society for Information Science and Technology* (JASIST)**
conceptualizing information, technology, and people: comparing information science and information systems literatures, 1436–1447

Journal Publishing
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
a comparison between the *China Scientific and Technical Papers and Citations Database* and the *Science Citation Index* in terms of journal hierarchies and inter-journal citation relations, 223–236
the publishing dynamics of catastrophic events, 856–861
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296

Journals. *See also* Electronic Journals; Open Access Journals
assessing the value of a journal beyond the impact factor, 1148–1161
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
can citation analysis of Web publications better detect research fronts?, 1285–1302
institutional journal costs in an open access environment, 108–120
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
understanding journal usage: a statistical analysis of citation and use, 39–50

Judgment
relevance: a review of the literature and framework for thinking on the notion in information science. part III: behavior and effects of relevance, 2126–2144

Kamada–Kawai Algorithm
visualizing the marrow of science, 2167–2179

Kantor, Paul
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959

Keyframes
prioritization strategies for video storyboard keyframes, 629–644

Keywords. *See* Index Terms

Kling, Rob
Kling and the "critical": social informatics and critical informatics, 575–582

Knowledge
conceptual approaches for defining data, information, and knowledge, 479–493
information policies and open source software in developing countries, 121–132
knowledge discovery based on an implicit and explicit conceptual network, 51–65
knowledge sharing in online environments: a qualitative case study, 2310–2324
towards understanding the roles of social capital in knowledge integration: a case study of collaborative information systems project, 263–274

Knowledge Fronts
topological analysis of citation networks to discover the future core articles, 872–882

Knowledge Management
an analysis of the delayed response to Hurricane Katrina through the lens of knowledge management, 391–403
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
a tale of two hurricanes: comparing Katrina and Rita through a knowledge management perspective, 1518–1528

DOI: 10.1002/asi

Knowledge Maps
classification schemes of information science: twenty-eight scholars map the field, 645–672
knowledge map of information science, 526–535
Knowledge-System Theory
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
Knowledge Transfer
the impact of survey data: measuring success, 190–199
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
Kuhlthau, Carol
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
Labor
description and search labor for information retrieval, 1783–1790
selection power and selection labor for information retrieval, 915–923
Laboratory Notebooks
order from chaos: the poetics and pragmatics of scientific recordkeeping, 1457–1466
Language and Languages
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686
engineering and utilizing a stopword list in Greek Web retrieval, 1645–1652
language as power on the Internet, 1899–1903
Language-Modeling Kernel Function
language-modeling kernel based approach for information retrieval, 2353–2365
Latent Semantic Indexing
determining the context of text using augmented latent semantic indexing, 2198–2205
a measure theoretic approach to information retrieval, 1108–1122
Lawyers. *See* Attorneys
Learning. *See* Education and Learning
Leimkuhler Curve
Egghe's construction of Lorenz curves resolved, 2157–2159
Lempel-Ziv Compression
Lempel-Ziv compression of highly structured documents, 461–478
Lexical Features
stylistic text classification using functional lexical features, 802–822
Libraries. *See also* Digital Libraries
determining factors of academic library Web site usage, 2325–2334
digital information support for domestic violence victims, 420–432
do information technology units have more power than other units in academic libraries?, 1242–1253
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
the impact of time constraints on Internet and Web use, 508–517
the impact of youth's use of the Internet on their use of the public library, 2180–2197
information seeking behavior of academic scientists, 2206–2226
institutional journal costs in an open access environment, 108–120
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
understanding journal usage: a statistical analysis of citation and use, 39–50
using lessons from health care to protect the privacy of library users: guidelines for the de-identification of library data based on HIPAA, 1198–1206
Library and Information Science. *See* Information Science; Information Science Literature
***Library and Information Science Abstracts* (LISA)**
keywords given by authors of scientific articles in database descriptors, 1175–1187
Life Information Needs
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719
Linear Classifiers
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)
Linear Space
a measure theoretic approach to information retrieval, 1108–1122
Linguistics
analogies between linguistics and information theory, 309–321
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686
linguistics and information theory: analytic advantages, 275–285
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709
Link Analysis (Criminal Justice)
automated criminal link analysis based on domain knowledge, 842–855
Link-Prediction
the link-prediction problem for social networks, 1019–1031
Links and Link Analysis
does topic metadata help with Web search?, 613–628
Google Scholar citations and Google Web/URL citations: a multi-discipline exploratory analysis, 1055–1065
how is science cited on the Web? a classification of Google unique Web citations, 1631–1644
link decay in leading information science journals, 15–24
mining Web functional dependencies for flexible information access, 1805–1819
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365
which factors explain the Web impact of scientists' personal homepages?, 200–211
LISA (*Library and Information Science Abstracts*)
keywords given by authors of scientific articles in database descriptors, 1175–1187
LISREL Analysis
determining factors of academic library Web site usage, 2325–2334
List Servers (LISTSERVS)
knowledge sharing in online environments: a qualitative case study, 2310–2324
Literacy Education
knowledge sharing in online environments: a qualitative case study, 2310–2324
***Livelink* System**
personalized recommendation with adaptive mixture of Markov models, 1851–1870
Log Analysis. *See* Web Transaction Log Analysis
Logic
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933
Lorenz Curves
on Egghe's construction of Lorenz curves, 1551–1552
Egghe's construction of Lorenz curves resolved, 2157–2159
TOP-curves, 777–785
Lotka's Law
dynamic *h*-index: the Hirsch index in function of time, 452–454
manifestation of research teams in journal literature: a growth model of papers, authors, collaboration, coauthorship, weak ties, and Lotka's law, 1764–1782
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709
Lower Things in Life
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
Machine Learning
automatic user preference learning for personalized electronic program guide applications, 1346–1356
language-modeling kernel based approach for information retrieval, 2353–2365
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Web-based text classification in the absence of manually labeled training documents, 88–96
Mann, Michael
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
Mantel Test
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609
Mapping
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
a framework for information quality assessment, 1720–1733

DOI: 10.1002/asi

Mapping *(Continued)*
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
integrating MPEG-7 into the Moving Image Collections Portal, 1357–1363
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
some comments on the question whether co-occurrence data should be normalized, 1701–1703
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
visualizing the marrow of science, 2167–2179

Maps
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
classification schemes of information science: twenty-eight scholars map the field, 645–672
knowledge map of information science, 526–535

Marchionini, Gary
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959

Markov Models. *See also* Hidden Markov Models (HMMs)
personalized recommendation with adaptive mixture of Markov models, 1851–1870

MARTT (Markuper of Taxonomic Treatments) System
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149

Mathematical Measure Theory
a measure theoretic approach to information retrieval, 1108–1122

Mathematical Models
a mathematical theory of citing, 1661–1673

Mathematical Proofs
untangling Herdan's law and Heaps' law: mathematical and informetric arguments, 702–709

Matrix Comparison
matrix comparison, part 1: motivation and important issues for measuring the resemblance between proximity measures or ordination results, 1586–1595
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609

Mean Average Precision (MAP)
statistical principal components analysis for retrieval experiments, 560–574

Measure Theory
a measure theoretic approach to information retrieval, 1108–1122

Measurement Model
determining factors of academic library Web site usage, 2325–2334

Media
diasporic information environments: reframing immigrant-focused information research, 1734–1744
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719

Media Richness Theory
understanding user acceptance of multimedia messaging services: an empirical study, 2066–2077

Medical Literature. *See* Biomedical Literature

Medical Subject Headings (MeSH)
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006

MEDLINE
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352

Melodies. *See* Music Information Retrieval

description and search labor for information retrieval, 1783–1790

Mental Models
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445

Meta Search Engines
Web searcher interaction with the Dogpile.com metasearch engine, 744–755

Metadata. *See also* MPEG-7 Standard
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352
does topic metadata help with Web search?, 613–628
a framework for information quality assessment, 1720–1733
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
a system for supporting evidence recording in bibliographic records, part II: what is valuable evidence for catalogers?, 823–841

Metric Functions
a framework for information quality assessment, 1720–1733

Mobile Devices
understanding user acceptance of multimedia messaging services: an empirical study, 2066–2077

Mode 2 Knowledge Production Theory
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381

Models and Modeling
an analysis of two approaches in information retrieval: from frameworks to study designs, 971–986
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686
determining factors of academic library Web site usage, 2325–2334
diasporic information environments: reframing immigrant-focused information research, 1734–1744
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
the double role of ontologies in information science research, 786–793
a framework for information quality assessment, 1720–1733
improving search engines by query clustering, 1793–1804
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
language-modeling kernel based approach for information retrieval, 2353–2365
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
manifestation of research teams in journal literature: a growth model of papers, authors, collaboration, coauthorship, weak ties, and Lotka's law, 1764–1782
a mathematical theory of citing, 1661–1673
a measure theoretic approach to information retrieval, 1108–1122
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
personalized recommendation with adaptive mixture of Markov models, 1851–1870
relationships between perceived features and similarity of images: a test of Tversky's contrast model, 1401–1418
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933
selection power and selection labor for information retrieval, 915–923
social-biological information technology: an integrated conceptual framework, 2021–2046
understanding information related fields: a conceptual framework, 1934–1947
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 1, 1162–1174

DOI: 10.1002/asi

Models and Modeling *(Continued)*
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 2, 1188–1197
user modeling for personalized Web search with self-organizing map, 494–507
when do researchers collaborate? toward a model of collaboration propensity, 2227–2240

Mongolia
social capital and the search for information: examining the role of social capital in information seeking behavior in Mongolia, 883–894

Motivation
knowledge sharing in online environments: a qualitative case study, 2310–2324

Motivational Theory
understanding user acceptance of multimedia messaging services: an empirical study, 2066–2077

Moving Image Collections Portal
integrating MPEG-7 into the Moving Image Collections Portal, 1357–1363

Moving Picture Experts Group (MPEG). ***See*** **MPEG-7 Standard**

MPEG-7 Standard
automatic user preference learning for personalized electronic program guide applications, 1346–1356
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
integrating MPEG-7 into the Moving Image Collections Portal, 1357–1363
MPEG-7 in practice: analysis of a television news retrieval application, 1364–1366
the MPEG-7 Standard: multimedia description in theory and application, 1323–1328
MPEG-7 tools for Universal Multimedia Access, 1374–1376
semantic description in MPEG-7: the rich recursion of ripeness, 1338–1345
structure description tools, 1329–1337
TV-Anytime Phase 1 and MPEG-7, 1367–1373

MSN Search
user rankings of search engine results, 1254–1266

Multidocument Summarization
automatic multidocument summarization of research abstracts: design and user evaluation, 1419–1435

Multimedia Content Description Interface. ***See*** **MPEG-7 Standard**

Multimedia Messaging Services
understanding user acceptance of multimedia messaging services: an empirical study, 2066–2077

Multiple Publication
multiple publication on a single research study: does it pay? the influence of number of research articles on total citation counts in biomedicine, 1100–1107

Multivariate Analysis
which factors explain the Web impact of scientists' personal homepages?, 200–211

MUSART Testbed
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701

Museums
the changing nature of information work in museums, 97–107

Music Information Retrieval
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701

N-Grams
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054

Naive Bayes Classifier
Web-based text classification in the absence of manually labeled training documents, 88–96

Name Matching
approximate personal name-matching through finite-state graphs, 1960–1976

Native Americans
ethnomethodological architectures: information systems driven by cultural and community visions, 723–733

Natural Language Processing
determining the context of text using augmented latent semantic indexing, 2195–2205
knowledge discovery based on an implicit and explicit conceptual network, 51–65

Navigation
a field study characterizing Web-based information-seeking tasks, 999–1018

Negative Beliefs
information systems project post-mortems: insights from an attribution perspective, 2256–2269

Negative Phenomena
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147

Nesna University College, Norway
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451

NetPASS (Networking Performance Skill System)
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309

New Discoveries
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743

News Retrieval
MPEG-7 in practice: analysis of a television news retrieval application, 1364–1366
news cues: information scent and cognitive heuristics, 366–378

Node Proximity
the link-prediction problem for social networks, 1019–1031

Normalization
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
some comments on the question whether co-occurrence data should be normalized, 1701–1703

Norway
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451

Novelty
relevance judgment in epistemic and hedonic information searches, 179–189

Nuclear Disasters
the publishing dynamics of catastrophic events, 856–861

Nursing
knowledge sharing in online environments: a qualitative case study, 2310–2324

Object Invariance Principle
a measure theoretic approach to information retrieval, 1108–1122

Objectivity
information: objective or subjective/situational?, 1448–1456

Online Communication. ***See*** **Electronic Communication**

Online Databases
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
keywords given by authors of scientific articles in database descriptors, 1175–1187
twenty-five years of end-user searching, part 1: research findings, 1071–1081
twenty-five years of end-user searching, part 2: future research directions, 1123–1130

Online Learning. ***See*** **Education and Learning**

Ontologies
the double role of ontologies in information science research, 786–793

Open Access Journals
assessing the value of a journal beyond the impact factor, 1148–1161
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054
Google Scholar citations and Google Web/URL citations: a multi-discipline exploratory analysis, 1055–1065
how is science cited on the Web? a classification of Google unique Web citations, 1631–1644
information seeking behavior of academic scientists, 2206–2226
institutional journal costs in an open access environment, 108–120
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296
tracking open access journals evolution: some considerations in open access data collection validation, 1578–1585

Open Archives Initiative
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296

Open Source Software
information policies and open source software in developing countries, 121–132

Opinions
mining opinions from the Web: beyond relevance retrieval, 1838–1850

Ordination Results
matrix comparison, part 1: motivation and important issues for measuring the resemblance between proximity measures or ordination results, 1586–1595

DOI: 10.1002/asi

Ordination Results *(Continued)*
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609

Organizations
overcoming knowledge management challenges during ERP implementation: the need to integrate and share different types of knowledge, 404–419
the proximal-virtual team continuum: a study of performance, 794–801
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365
towards understanding the roles of social capital in knowledge integration: a case study of collaborative information systems project, 263–274
understanding information related fields: a conceptual framework, 1934–1947

Paradigms
analogies between linguistics and information theory, 309–321
linguistics and information theory: analytic advantages, 275–285

Parallel Processing
exploiting parallelism to support scalable hierarchical clustering, 1207–1221

Part-of-Speech Tagger
determining the context of text using augmented latent semantic indexing, 2198–2205

Partitioning Clustering
exploiting parallelism to support scalable hierarchical clustering, 1207–1221

PathfinderNetworks (PFNET)
visualizing the marrow of science, 2167–2179

Pearson Correlation Coefficient
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
some comments on the question whether co-occurrence data should be normalized, 1701–1703

Peer Review
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743

Pennant Diagrams
combining bibliometrics, information retrieval, and relevance theory, part 1: first examples of a synthesis, 536–559
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605

Perceived Usefulness Mediated Impact Model
determining factors of academic library Web site usage, 2325–2334

Performance
the proximal-virtual team continuum: a study of performance, 794–801

Personal Information Management Systems
towards memory supporting personal information management tools, 924–946

Personal Names
approximate personal name-matching through finite-state graphs, 1960–1976

Personal Preferences
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719

Personalization
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309
automatic cognitive style identification of digital library users for personalization, 237–251
automatic user preference learning for personalized electronic program guide applications, 1346–1356
personalized recommendation with adaptive mixture of Markov models, 1851–1870
quality search content: a reality with next generation browsers [letter to the editor], 1223
user modeling for personalized Web search with self-organizing map, 494–507

Philosophy
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933

Phonix Algorithms
approximate personal name-matching through finite-state graphs, 1960–1976

PhotoMemory Interface
towards memory supporting personal information management tools, 924–946

Physicists
frequency and structure of long distance scholarly collaborations in a physics community, 1497–1502

Physics Literature
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054

Planned Behavior Theory
punishment and ethics deterrents: a study of insider security contravention, 212–222

Planning
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998

Pleasure
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
relevance judgment in epistemic and hedonic information searches, 179–189

Politics
identifying and characterizing public science-related fears from RSS feeds, 379–390
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
language as power on the Internet, 1899–1903

Port-Mortems
information systems project post-mortems: insights from an attribution perspective, 2256–2269

Positive Phenomena
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147

Post-Normal Science Theory
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381

Power
do information technology units have more power than other units in academic libraries?, 1242–1253
information systems project post-mortems: insights from an attribution perspective, 2256–2269
language as power on the Internet, 1899–1903

Power-Law Distribution
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
a mathematical theory of citing, 1661–1673

Predictors
the link-prediction problem for social networks, 1019–1031

Principal Components Analysis
statistical principal components analysis for retrieval experiments, 560–574

Privacy
development of measures of online privacy concern and protection for use on the Internet, 157–165
digital information support for domestic violence victims, 420–432
predicting user concerns about online privacy, 710–722
using lessons from health care to protect the privacy of library users: guidelines for the de-identification of library data based on HIPAA, 1198–1206

Probability-Based Information Retrieval
a measure theoretic approach to information retrieval, 1108–1122

Problem Solving
relevance judgment in epistemic and hedonic information searches, 179–189

Processing Effort
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605

Procrustes Analysis
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609

Professional Practice
information technology support for communities of practice: how public defenders learn about winning and losing in court, 76–87

Proximal Cues
news cues: information scent and cognitive heuristics, 366–378

Proximal-Virtual Teams
the proximal-virtual team continuum: a study of performance, 794–801

Proximity Measures
the link-prediction problem for social networks, 1019–1031

DOI: 10.1002/asi

Proximity Measures *(Continued)*
matrix comparison, part 1: motivation and important issues for measuring the resemblance between proximity measures or ordination results, 1586–1595
matrix comparison, part 2: measuring the resemblance between proximity measures or ordination results by use of the Mantel and Procrustes statistics, 1596–1609

PROXSCAL Program (SPSS)
some comments on the question whether co-occurrence data should be normalized, 1701–1703

Psychological Relevance
news cues: information scent and cognitive heuristics, 366–378

Psychology
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
predicting user concerns about online privacy, 710–722

Public Defenders
information technology support for communities of practice: how public defenders learn about winning and losing in court, 76–87

Public Libraries
digital information support for domestic violence victims, 420–432
the impact of time constraints on Internet and Web use, 508–517
the impact of youth's use of the Internet on their use of the public library, 2180–2197

Public Library of Science (PLoS)
institutional journal costs in an open access environment, 108–120

Public Opinion
identifying and characterizing public science-related fears from RSS feeds, 379–390

Public Policy
identifying and characterizing public science-related fears from RSS feeds, 379–390
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
information policies and open source software in developing countries, 121–132
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
language as power on the Internet, 1899–1903

Publishing. ***See also*** **Journal Publishing**
the publishing dynamics of catastrophic events, 856–861

PubMed
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006

Punishment
punishment and ethics deterrents: a study of insider security contravention, 212–222

Quality of Information
a framework for information quality assessment, 1720–1733

Quantum Tutors
adaptive technology for e-learning: principles and case studies of an emerging field, 2295–2309

Queries
data mining of search engine logs, 2382–2400
defining a session on Web search engines, 862–871
improving search engines by query clustering, 1793–1804
temporal analysis of a very large topically categorized Web query log, 166–178
twenty-five years of end-user searching, part 1: research findings, 1071–1081
Web searcher interaction with the Dogpile.com metasearch engine, 744–755
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054

Query-by-Humming Systems
a comparative evaluation of search techniques for query-by-humming using the MUSART testbed, 687–701

Query Formulation. ***See also*** **Query Reformulation**
browsing and searching in a faceted information space: a naturalistic study of PubMed users' interaction with a display tool, 1998–2006
a classification of mental models of undergraduates seeking information for a course essay in history and psychology: preliminary investigations into aligning their mental models with online thesauri, 2092–2104
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
need for a systemic theory of classification in information science, 1977–1987
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
task-based information retrieval: structuring undergraduate history essays for better course evaluation using essay-type visualizations, 1227–1241
twenty-five years of end-user searching, part 1: research findings, 1071–1081

Query Languages
a query language for discovering semantic associations, part I: approach and formal definition of query primitives, 1559–1568
a query language for discovering semantic associations, part II: sample queries and query evaluation, 1686–1700

Query Reformulation
data mining of search engine logs, 2382–2400
defining a session on Web search engines, 862–871
the dynamics of interactive information retrieval behavior, part I: an activity theory perspective, 958–970
the dynamics of interactive information retrieval behavior, part II: an empirical study from the activity theory perspective, 987–998
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)

Query Transformation
data mining of search engine logs, 2382–2400

Query Translation
corpus-based cross-language information retrieval in retrieval of highly relevant documents, 322–334

Question-Answering Systems
a model for quantitative evaluation of an end-to-end question-answering system, 1082–1099
using interview data to identify evaluation criteria for interactive, analytical question-answering systems, 1032–1043

Random-Citing Scientists Model
a mathematical theory of citing, 1661–1673

Ranking
impact of data sources on citation counts and rankings of LIS faculty: Web of Science *versus* Scopus and Google Scholar, 2105–2125
improving search engines by query clustering, 1793–1804
matrix comparison, part 1: motivation and important issues for measuring the resemblance between proximity measures or ordination results, 1586–1595
user rankings of search engine results, 1254–1266

RE-PAIR Mechanism
block merging for off-line compression, 3–14

Reactance Theory
forced-response in online surveys: bias from reactance and an increase in sex-specific dropout, 1653–1660

Reading
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763

Recollection
towards memory supporting personal information management tools, 924–946

Recommender Systems
personalized recommendation with adaptive mixture of Markov models, 1851–1870

Recordkeeping
order from chaos: the poetics and pragmatics of scientific recordkeeping, 1457–1466

Redips (Software)
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365

Regression Analysis
understanding journal usage: a statistical analysis of citation and use, 39–50

Rejection of Articles
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743

Relative Analytic Distance (RAD)
statistical principal components analysis for retrieval experiments, 560–574

Relevance
assessing aesthetic relevance: children's book selection in a digital library, 1745–1763
the dynamics of interactive information retrieval behavior, part I: an activity theory perspective, 958–970

DOI: 10.1002/asi

Relevance *(Continued)*
improving search engines by query clustering, 1793–1804
relevance: a review of the literature and framework for thinking on the notion in information science. part II: nature and manifestations of relevance, 1915–1933
relevance: a review of the literature and framework for thinking on the notion in information science. part III: behavior and effects of relevance, 2126–2144
relevance judgment in epistemic and hedonic information searches, 179–189

Relevance Feedback
need for a systemic theory of classification in information science, 1977–1987
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)
relevance: a review of the literature and framework for thinking on the notion in information science. part III: behavior and effects of relevance, 2126–2144
twenty-five years of end-user searching, part 1: research findings, 1071–1081

Relevance Theory
combining bibliometrics, information retrieval, and relevance theory, part 1: first examples of a synthesis, 536–559
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605

Reliability of Information
making sense of credibility on the Web: models for evaluating online information and recommendations for future research, 2078–2091

Research
order from chaos: the poetics and pragmatics of scientific recordkeeping, 1457–1466
when do researchers collaborate? toward a model of collaboration propensity, 2227–2240

Research Design
twenty-five years of end-user searching, part 2: future research directions, 1123–1130

Research Fronts
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957
information and higher things in life: addressing the pleasurable and the profound in information science, 1131–1147
manifestation of research teams in journal literature: a growth model of papers, authors, collaboration, coauthorship, weak ties, and Lotka's law, 1764–1782
topological analysis of citation networks to discover the future core articles, 872–882

Research Groups
impact of research cultures on the use of digital libraries, 1674–1685
manifestation of research teams in journal literature: a growth model of papers, authors, collaboration, coauthorship, weak ties, and Lotka's law, 1764–1782

Researchers. ***See*** **Scholars; Scientists**

Reuters-21578 Test Collection
Web-based text classification in the absence of manually labeled training documents, 88–96

Rocchio's Similarity-Based Relevance Feedback Algorithm
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)

Rough Set Theory
the generalized dependency degree between attributes, 2280–2294

RSS (Really Simple Syndication)
identifying and characterizing public science-related fears from RSS feeds, 379–390

Saracevic, Tefko
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959

Scalable Clustering
exploiting parallelism to support scalable hierarchical clustering, 1207–1221

Scholarly Communication
can citation analysis of Web publications better detect research fronts?, 1285–1302
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
information seeking behavior of academic scientists, 2206–2226
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296

Scholarly Publishing
link decay in leading information science journals, 15–24
multiple publication on a single research study: does it pay? the influence of number of research articles on total citation counts in biomedicine, 1100–1107

Scholars. ***See also*** **Authors and Authorship; Scientists**
humanists as information users in the digital age: the case of Jewish studies scholars in Israel, 2270–2279
impact of data sources on citation counts and rankings of LIS faculty: Web of Science *versus* Scopus and Google Scholar, 2105–2125
information seeking behavior of academic scientists, 2206–2226
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
using the *h*-index to rank influential British researchers in information science and librarianship, 297–301
what do we know about the *h* index?, 1381–1385
which factors explain the Web impact of scientists' personal homepages?, 200–211

Schools of Information Science. ***See*** **Universities**

Science. ***See also*** **Technology**
identifying and characterizing public science-related fears from RSS feeds, 379–390
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
knowledge-system theory in society: charting the growth of knowledge-system models over a decade, 1994-2003, 2372–2381
order from chaos: the poetics and pragmatics of scientific recordkeeping, 1457–1466
visualizing the marrow of science, 2167–2179

Science Citation Index
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
can citation analysis of Web publications better detect research fronts?, 1285–1302
a comparison between the *China Scientific and Technical Papers and Citations Database* and the *Science Citation Index* in terms of journal hierarchies and inter-journal citation relations, 223–236
tracking open access journals evolution: some considerations in open access data collection validation, 1578–1585
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
visualizing the marrow of science, 2167–2179

Scientific Literature
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
citation data analysis on hydrogeology, 518–525
the citation performance of open access journals: a disciplinary investigation of citation distribution models, 2145–2156
a comparison between the *China Scientific and Technical Papers and Citations Database* and the *Science Citation Index* in terms of journal hierarchies and inter-journal citation relations, 223–236
comparison of full-text searching to metadata searching for genes in two biomedical literature cohorts, 2341–2352
the effect of "open access" on citation impact: an analysis of ArXiv's condensed matter section, 2047–2054
how is science cited on the Web? a classification of Google unique Web citations, 1631–1644
keywords given by authors of scientific articles in database descriptors, 1175–1187
knowledge discovery based on an implicit and explicit conceptual network, 51–65
multiple publication on a single research study: does it pay? the influence of number of research articles on total citation counts in biomedicine, 1100–1107
rejecting highly cited papers: the views of scientists who encounter resistance to their discoveries from other scientists, 734–743
the role of Web-based information in the scholarly communication of chemists: citation and content analyses of American Chemical Society journals, 2055–2065
topological analysis of citation networks to discover the future core articles, 872–882
tracking open access journals evolution: some considerations in open access data collection validation, 1578–1585

DOI: 10.1002/asi

description and search labor for information retrieval, 1783–1790
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
a library or just another information resource? a case study of users' mental models of traditional and digital libraries, 433–445
linguistics and information theory: analytic advantages, 275–285
the search experience variable in information behavior research, 1529–1546
twenty-five years of end-user searching, part 1: research findings, 1071–1081
twenty-five years of end-user searching, part 2: future research directions, 1123–1130
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 1, 1162–1174
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 2, 1188–1197
Security
digital information support for domestic violence victims, 420–432
punishment and ethics deterrents: a study of insider security contravention, 212–222
Segmentation
mining Web data for Chinese segmentation, 1820–1837
Segments of Multimedia Content
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
structure description tools, 1329–1337
Selection Power and Labor
description and search labor for information retrieval, 1783–1790
selection power and selection labor for information retrieval, 915–923
Self-Appointed Mindset
information systems project post-mortems: insights from an attribution perspective, 2256–2269
Self-Archiving
self-archiving and the copyright transfer agreements of ISI-ranked library and information science journals, 286–296
Self Efficacy
predicting user concerns about online privacy, 710–722
Self-Organizing Maps
user modeling for personalized Web search with self-organizing map, 494–507
Semantic Associations
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
a query language for discovering semantic associations, part I: approach and formal definition of query primitives, 1559–1568
a query language for discovering semantic associations, part II: sample queries and query evaluation, 1686–1700
Semantic Description
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
semantic description in MPEG-7: the rich recursion of ripeness, 1338–1345
Semantic Text Analysis
determining the context of text using augmented latent semantic indexing, 2198–2205
the reusability of induced knowledge for the automatic semantic markup of taxonomic descriptions, 133–149
Semiotics
information: objective or subjective/situational?, 1448–1456
Seniors
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617
Session Identification
defining a session on Web search engines, 862–871
Sex. ***See*** **Gender**
Similarity-Based Clustering
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617
Similarity-Based Relevance Feedback Algorithm
on the complexity of Rocchio's similarity-based relevance feedback algorithm, 1392–1400, 2414 (erratum)
Similarity Matching
approximate personal name-matching through finite-state graphs, 1960–1976
relationships between perceived features and similarity of images: a test of Tversky's contrast model, 1401–1418
Situational Information Theory
information: objective or subjective/situational?, 1448–1456
Slovenia
an assessment of the usability of an Internet-based education system in a cross-cultural environment: the case of the Interreg Crossborder Program in Central Europe, 66–75
Social-Biological Information Technology
social-biological information technology: an integrated conceptual framework, 2021–2046

DOI: 10.1002/asi

Social Capital
social capital and the search for information: examining the role of social capital in information seeking behavior in Mongolia, 883–894
towards understanding the roles of social capital in knowledge integration: a case study of collaborative information systems project, 263–274
Social Influences
the proximal-virtual team continuum: a study of performance, 794–801
understanding information related fields: a conceptual framework, 1934–1947
when do researchers collaborate? toward a model of collaboration propensity, 2227–2240
Social Informatics
fighting child pornography: exploring didactics and student engagement in social informatics, 446–451
Kling and the "critical": social informatics and critical informatics, 575–582
Social Networks
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
the link-prediction problem for social networks, 1019–1031
social capital and the search for information: examining the role of social capital in information seeking behavior in Mongolia, 883–894
Social Phenomenology
information source horizons and source preferences of environmental activists: a social phenomenological approach, 1709–1719
Social Sciences Citation Index
betweenness centrality as an indicator of the interdisciplinarity of scientific journals, 1303–1319
structure of the impact factor of journals included in the *Social Sciences Citation Index*: citations from documents labeled "editorial material," 252–262
visualization of the citation impact environments of scientific journals: an online mapping exercise, 25–38
visualizing the marrow of science, 2167–2179
Social Systems
ethnomethodological architectures: information systems driven by cultural and community visions, 723–733
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
Soergel, Dagobert
timeliness of creativity: a study of intellectual innovators in information science, 1948–1959
Software Engineering
information policies and open source software in developing countries, 121–132
information systems project post-mortems: insights from an attribution perspective, 2256–2269
SOGOU Search Engine
data cleansing for Web information retrieval using query independent features, 1884–1898
Soundex Algorithms
approximate personal name-matching through finite-state graphs, 1960–1976
Source Credibility
news cues: information scent and cognitive heuristics, 366–378
Spatial Organization
effects of spacing and titles on judgments of the effectiveness of structured abstracts, 2335–2340
Specificity
combining bibliometrics, information retrieval, and relevance theory, part 1: first examples of a synthesis, 536–559
combining bibliometrics, information retrieval, and relevance theory, part 2: some implications for information science, 583–605
Spelling
approximate personal name-matching through finite-state graphs, 1960–1976
SPSS 14.0.1
should co-occurrence data be normalized? a rejoinder [letter to the editor], 2411–2413
SPSS PROXSCAL
some comments on the question whether co-occurrence data should be normalized, 1701–1703
Statistical Analysis
information, analysis, and ideology: a case study of science and the public interest, 2366–2371
understanding journal usage: a statistical analysis of citation and use, 39–50
Statistical Knowledge Network
investigating and modeling metadata use to support information architecture development in the statistical knowledge network, 1267–1284
Statistical Specificity
combining bibliometrics, information retrieval, and relevance theory, part 1: first examples of a synthesis, 536–559
Stemming Algorithms
design, implementation, and evaluation of a methodology for automatic stemmer generation, 673–686
Stopword Lists
engineering and utilizing a stopword list in Greek Web retrieval, 1645–1652
Storyboards
prioritization strategies for video storyboard keyframes, 629–644
Strategic Contingencies Theory
do information technology units have more power than other units in academic libraries?, 1242–1253
String Matching
approximate personal name-matching through finite-state graphs, 1960–1976
Structuration Theory
geographic information technologies, structuration theory, and the World Trade Center crisis, 2241–2255
Structure Description
enabling MPEG-7 structural and semantic descriptions in retrieval applications, 1377–1380
structure description tools, 1329–1337
Structured Abstracts
effects of spacing and titles on judgments of the effectiveness of structured abstracts, 2335–2340
Structured Documents
Lempel-Ziv compression of highly structured documents, 461–478
Students. ***See also*** **Undergraduate Students**

Web Searching *(Continued)*
does domain knowledge matter: mapping users' expertise to their information interactions, 2007–2020
does topic metadata help with Web search?, 613–628
engineering and utilizing a stopword list in Greek Web retrieval, 1645–1652
a field study characterizing Web-based information-seeking tasks, 999–1018
high school students' information seeking and use for class projects, 1503–1517
how do Web users respond to non-banner-ads animation? the effects of task type and user experience, 1467–1482
the impact of time constraints on Internet and Web use, 508–517
inclusive interface design for seniors: image-browsing for a health information context, 1610–1617
linguistics and information theory: analytic advantages, 275–285
making sense of credibility on the Web: models for evaluating online information and recommendations for future research, 2078–2091
quality search content: a reality with next generation browsers [letter to the editor], 1223
Redips: backlink search and analysis on the Web for business intelligence analysis, 351–365
relevance judgment in epistemic and hedonic information searches, 179–189
the search experience variable in information behavior research, 1529–1546
supporting elementary-age children's searching and browsing: design and evaluation using the International Children's Digital Library, 1618–1630
temporal analysis of a very large topically categorized Web query log, 166–178
twenty-five years of end-user searching, part 1: research findings, 1071–1081
twenty-five years of end-user searching, part 2: future research directions, 1123–1130
understanding student information behavior in relation to electronic information services: lessons from longitudinal monitoring and evaluation, part 2, 1188–1197
user modeling for personalized Web search with self-organizing map, 494–507
user rankings of search engine results, 1254–1266
Web searcher interaction with the Dogpile.com metasearch engine, 744–755
Web searching in Chinese: a study of a search engine in Hong Kong, 1044–1054

Web Transaction Log Analysis
characterizing Web users' online information behavior, 1988–1997
data mining of search engine logs, 2382–2400
improving search engines by query clustering, 1793–1804
mining related queries from Web search engine query logs using an improved association rule mining model, 1871–1883
temporal analysis of a very large topically categorized Web query log, 166–178

Webometrics
can citation analysis of Web publications better detect research fronts?, 1285–1302
changes in the LIS research front: time-sliced cocitation analyses of LIS journal articles, 1990–2004, 947–957
Google Scholar citations and Google Web/URL citations: a multi-discipline exploratory analysis, 1055–1065
how is science cited on the Web? a classification of Google unique Web citations, 1631–1644
link decay in leading information science journals, 15–24
which factors explain the Web impact of scientists' personal homepages?, 200–211

RESEARCH

A Query Language for Discovering Semantic Associations, Part I: Approach and Formal Definition of Query Primitives
Timo Niemi and Janne Jämsen
Published online 16 July 2007 **1559**

The Development of a Facet Analysis System to Identify and Measure the Dimensions of Interaction in Online Learning
Shawne D. Miksa, Kathleen Burnett, Laurie J. Bonnici, and Joonmin Kim
Published online 6 July 2007 **1569**

Tracking Open Access Journals Evolution: Some Considerations in Open Access Data Collection Validation
Hajar Sotudeh and Abbas Horri
Published online 11 July 2007 **1578**

Matrix Comparison, Part 1: Motivation and Important Issues for Measuring the Resemblance Between Proximity Measures or Ordination Results
Jesper W. Schneider and Pia Borlund
Published online 13 July 2007 **1586**

Matrix Comparison, Part 2: Measuring the Resemblance Between Proximity Measures or Ordination Results by Use of the Mantel and Procrustes Statistics
Jesper W. Schneider and Pia Borlund
Published online 18 July 2007 **1596**

Inclusive Interface Design for Seniors: Image-Browsing for a Health Information Context
Lisa M. Given, Stan Ruecker, Heather Simpson, Elizabeth (Bess) Sadler, and Andrea Ruskin
Published online 11 July 2007 **1610**

Supporting Elementary-Age Children's Searching and Browsing: Design and Evaluation Using the International Children's Digital Library
Hilary Browne Hutchinson, Allison Druin, Benjamin B. Bederson
Published online 17 July 2007 **1618**

How Is Science Cited on the Web? A Classification of Google Unique Web Citations
Kayvan Kousha and Mike Thelwall
Published online 18 July 2007 **1631**

Engineering and Utilizing a Stopword List in Greek Web Retrieval
Fotis Lazarinis
Published online 17 July 2007 **1645**

Forced-Response in Online Surveys: Bias from Reactance and an Increase in Sex-Specific Dropout
Stefan Stieger, Ulf-Dietrich Reips and Martin Voracek
Published online 11 July 2007 **1653**

A Mathematical Theory of Citing
Mikhail V. Simkin and Vwani P. Roychowdhury
Published online 13 July 2007 **1661**

Impact of Research Cultures on the Use of Digital Library Resources
Sanna Talja, Pertti Vakkari, Jenny Fry, and Paul Wouters
Published online 11 July 2007 **1674**

A Query Language for Discovering Semantic Associations, Part II: Sample Queries and Query Evaluation
Timo Niemi and Janne Jämsen
Published online 19 July 2007 **1686**

BRIEF COMMUNICATION

Some Comments on the Question Whether Co-Occurrence Data Should Be Normalized
Ludo Waltman and Nees Jan van Eck
Published online 6 July 2007 **1701**

BOOK REVIEWS

Women and Information Technology: Research on Underrepresentation
Denise E. Agosto

RESEARCH

Information Source Horizons and Source Preferences of Environmental Activists: A Social Phenomenological Approach
Reijo Savolainen
Published online 24 August 2007 **1709**

A Framework for Information Quality Assessment
Besiki Stvilia, Les Gasser, Michael B. Twidale and Linda C. Smith
Published online 17 August 2007 **1720**

Diasporic Information Environments: Reframing Immigrant-Focused Information Research
Ramesh Srinivasan and Ajit Pyati
Published online 17 August 2007 **1734**

Assessing Aesthetic Relevance: Children's Book Selection in a Digital Library
Kara Reuter
Published online 17 August 2007 **1745**

Manifestation of Research Teams in Journal Literature: A Growth Model of Papers, Authors, Collaboration, Coauthorship, Weak Ties, and Lotka's Law
Steven A. Morris and Michel L. Goldstein
Published online 24 August 2007 **1764**

Description and Search Labor for Information Retrieval
Julian Warner
Published online 24 August 2007 **1783**

Introduction to the Special Topic Section on Mining Web Resources for Enhancing Information Retrieval
Wai Lam, Christopher C. Yang, and Filippo Menczer
Published online 23 July 2007 **1791**

Improving Search Engines by Query Clustering
Ricardo Baeza-Yates, Carlos Hurtado, and Marcelo Mendoza
Published online 6 September 2007 **1793**

Mining Web Functional Dependencies for Flexible Information Access
Saverio Perugini and Naren Ramakrishnan
Published online 6 September 2007 **1805**

Mining Web Data for Chinese Segmentation
Fu Lee Wang and Christopher C. Yang
Published online 17 August 2007 **1820**

Mining Opinions from the Web: Beyond Relevance Retrieval
Lun-Wei Ku and Hsin-Hsi Chen
Published online 3 August 2007 **1838**

Personalized Recommendation with Adaptive Mixture of Markov Models
Yang Liu, Xiangji Huang and Aijun An
Published online 24 August 2007 **1851**

Mining Related Queries from Web Search Engine Query Logs Using an Improved Association Rule Mining Model
Xiaodong Shi and Christopher C. Yang
Published online 3 August 2007 **1871**

Data Cleansing for Web Information Retrieval Using Query Independent Features
Yiqun Liu, Min Zhang, Rongwei Cen, Liyun Ru, and Shaoping Ma
Published online 23 July 2007 **1884**

BRIEF COMMUNICATIONS

Language as Power on the Internet
Madelyn Flammia and Carol Saunders
